6 Item 3.3—Attachment C  
Fiscal Year 2010-11

- 
- <sup>i</sup> The State funds shown in the attachment are used to finance specific phases of each project. These phases are designated by the following letters; Preliminary Plans (P), Working Drawings (W) Construction (C), and Equipment (E).
  - <sup>ii</sup> Design-Build Program Projects—Projects that participate in the program receive state funding in the following phase: Design (D), Build (B) and if applicable Equipment (E). Because use of the Design Build delivery method is a new program for community colleges, district are given at least a year to complete the D phase before the funding of the B phase is authorized.
  - <sup>iii</sup> Ready Access Program Projects—Projects that participate in the program receive lump-sum state funding for all project phases in one Budget Act appropriation. The goal of Ready Access Program is to save state bond dollars with no cost to the General Fund while allowing local community college districts the ability to complete their projects faster in order to address growth and modernization facility needs. The program saves the state money because a local contribution to offset state supportable costs is required in order for districts to participate in the program and shortens the period to complete projects by at least one budget cycle.
