

# APPROVAL OF CONTRACTS AND GRANTS

2.1

## *CONSENT CALENDAR*

*Presentation:* Steven Bruckman, Executive Vice Chancellor of Operations

### **Issue**

This item presents contracts and grants for Board approval.

### **Background**

The Board of Governors *Procedures and Standing Orders* (Sections 318 and 319) require the Chancellor to receive Board approval before entering into contracts or grants (or amendments of contracts or grants) which are:

1. in excess of \$100,000; or
2. over three years in duration; or
3. with respect to consulting services, in excess of \$50,000.

### **Analysis**

For each Board meeting, staff prepares a summary of all currently proposed contracts and grants that exceed any of the Board established thresholds. If there are no proposed contracts or grants that exceed the established thresholds, the Board will be so informed at its meeting.

### **Recommended Action**

That the Board of Governors approve entering into the contracts and grants described in the attached summary.

**Reason for Board Approval:** Grant Total Exceeds \$100,000.  
**RFA Specification No.:** 08-0136  
**RFA Specification Title:** 3C Media Solutions  
**Funding Source:** TTIP/outgoing funds  
**Type of Agreement:** Grant  
**Grantee:** Palomar CCD  
**Grant No.:** 08-0136-001  
**Term:** 7/1/09 – 6/30/10  
**Total Project Length:** Up to 5 years (60 months)  
**Project Year:** 2nd Year  
**Amount of Agreement:** Not to exceed \$2,500,000  
**Bid Process:** RFA - Competitive bid

**Purpose:** The California Community Colleges Satellite Network, CCCSAT, was a statewide initiative funded by competitive grant through the Telecommunications and Technology Infrastructure Program (TTIP). The central network facility (uplink) has been located at Palomar Community College in San Marcos, CA. The grant was awarded and began implementation in 1999. The early years were spent building the infrastructure. CCCSAT began delivering classes in January 2001. The Affiliate Contribution Network (ACN) is the closed-circuit satellite channel that feeds professional development and distance education programming directly to the colleges. CCCSAT began broadcasting the Board of Governors meetings in July 2002. Currently technical staff (2) attend each BOG meeting and install temporary high end cameras and codec to broadcast the entire meeting to the colleges. The BOG meetings are also captioned and web cast for access by the colleges and other interested parties.

Every community college and district office in the CCC system was equipped with a CCCSAT satellite downlink. CCCSAT operates approximately 168 hours weekly for 24hours, 7 days a week. There is an advisory committee assisting the project drawn from California Community Colleges staff, leaders and projects.

With new services and others planned, the CCCSAT Project was rebranded as 3C Media Solutions in 2006-07. 3C Media Solutions, formerly CCCSAT, is the Systemwide digital satellite communications system for broadcast of distance education, instructional and professional development to every California community college, district office and the CCC System Office. 3C Media Solutions also provides digital media services to the system and has increased its services to include streaming media accounts, live and recorded web casting and podcasting, media-on-demand, conference services and media production coordination.

This grant will oversee the continued implementation, marketing and management of the technologies described and provide leadership in new related services for the California Community Colleges. There is grant that is housed at Palomar CCD in partnership with San Bernardino CCD that offers these services now. This grant will need to ensure any transition from the current grant to this next phase is smooth and there is no service interruption to the system.

**Bid Process:** RFA - Competitive bid

**Purpose:** This project provides the mechanism to continue the implementation of the California Community Colleges Telecommunication and Technology Program (TTIP). This project will enhance the system's commitment to telecommunications and technology in meeting the educational needs of students in the California Community Colleges.

The Corporation for Education Network Initiatives in California (CENIC) represents the common interests of California's higher education academic and research communities in achieving high capacity, next generation Internet communications services. It provides the California Community College System Office, the colleges and CENIC a single point of contact for the management of the continued implementation of backbone and bandwidth expansion, Internet access and videoconferencing services. The CCC Technology Center assists with the CCC participation and representation related to these initiatives.

New technologies are constantly emerging and offering more cost effective, efficient alternatives to current technology. This project will assist the California Community Colleges System Office, the Telecommunications and Technology Advisory Committee (TTAC) by leading research and development projects, conducting technical research and in general maintaining an "environmental scan" to determine technology trends and their impact on the achievement of systemwide goals.

In addition, this project will take the lead in research and development projects, conduct technical research, and perform other technical activities as directed by the CCCSO. This project will act as a technical resource and/or clearinghouse to respond to inquiries by the CCCSO. Certain production projects, such as CCCApply, CCCTran and CCC Clearinghouse are supported through the CCC Technology Center.

**Purpose:** This project will continue the develop of the systemwide training center that enables faculty and staff to learn how to (a) use current technology to design effective learning experiences and (b) how to integrate such experiences with other forms of instruction, both traditional and innovative. The project interfaces closely with the California Virtual Campus

Regional Projects (CVCs), the statewide 3C Media Solutions, the e-conferencing project and the videoconferencing initiative and where appropriate, other similar technology and/or training initiatives by the CCC Chancellor's Office or in the other segments of public education in California.

The mission of @ONE is to assist California Community College faculty and staff to enhance student learning and success through expanded uses of effective technology by providing training, online resources and support.

The @ONE Project, originally called the Center for California Community Colleges at the Outcomes Network for Educators (4C@ONE), was first funded by the Chancellor's Office of the California Community College in 1997 to enhance instruction and services through expanded uses of technology in the colleges. The current @ONE project has established a comprehensive statewide training and development infrastructure to support faculty and staff at the 110 community colleges in California. This last year the @ONE project established a Distance Education Certification Program and a Trainer's Bureau.

**Purpose:** California Partnership for the Achievement of Student Success (Cal-PASS, <http://www.cal-pass.org/>) began in 1998 as a data-sharing project between San Diego State University and the Grossmont-Cuyamaca Community College District to collect and share student performance data as students progress from one educational level to the next. Since then, Cal-PASS has been bringing together primary, secondary and post-secondary segments through regional educational data sharing partnerships.

Cal-PASS is a data sharing system that helps educators identify and reduce barriers to student achievement at each educational level as students transition from kindergarten through college. The data from within and between educational segments is used to make changes and to monitor the effectiveness of existing or modified practices. Faculty consortia, consisting of discipline specific teachers from each education segments become the forum to review, discuss, and address the data. This is the setting for making changes in the classroom and tracking the

benefits of the changes. Cal-PASS is the only information resource that connects K-12 with higher education for the purpose of improving student success.

<b>Project Year:</b>	5th Year
<b>Amount of Agreement:</b>	Not to exceed \$2,500,000
<b>Bid Process:</b>	<b>RFA - Competitive bid</b>

**Purpose:** The California Virtual Campus (CVC) is a continuation of a six-year statewide effort to fund a comprehensive program for supporting faculty in teaching and designing Web-based instruction, and other expenses for conversion of courses for distance and/or on-line education. Under the direction of the Chancellor's Office, California Community Colleges, the CVC will serve as the statewide, centralized resource for the entire California Community College system for support of distance and online learning. In collaboration with the Chancellor's Office, California Community Colleges and other state sponsored or funded committees and programs (e.g., Telecommunications and Technology Advisory Committee [TTAC], Systemwide Architecture Committee [SAC], @ONE, 3C Media Solutions, California Community Colleges e-conferencing [CCC Confer]), the CVC will serve in a broader capacity that will include online teaching and learning, hereafter referred to as e-learning.

Initial initiatives have focused on:

- Hosting Course Management Systems (CMS) with Account Administration of courses as needed
- CMS Open Source Support (ETUDES, Moodle)
- On-line Teaching Conference (OTC)
- Virtual Catalog of online courses
- MERLOT (Multimedia Education Resources for Learning and Online Teaching) Initiative Support
- Virtual and in-person Conference on on-line instruction and distance education

<b>Bid Process:</b>	<b>RFA - Competitive bid</b>

**Purpose:** This grant funds the deployment and the support services needed to continue to make audio and web conferencing services available as an effective service for the CA Community College constituents. Its purpose is to foster collaborative events and meetings. Thus save time and money by cutting down travel to and from meetings. In addition, it is the intent of the project to reach out to faculty and students to offer this service for instruction and instructional support, such as virtual office hours, live classroom, voice tools, etc.

- Maintain and improve the system-wide *e*-conferencing service using 800# access or Voice over IP (toll free).
- Maintain current infrastructure, hardware and software necessary to store, maintain and provide secure access for CCC faculty, staff and students.
- Continue to evaluate and oversee the acquisition of hardware, software and networking or service bureau options for *e*-conferencing, as needed.
- Provide for the physical location and facilities for *e*-conferencing center.
- Manage on-going technical operations for the *e*-conferencing center.
- Develop and/or update the implementation and maintenance plan.
- Update and continue to support a training plan to facilitate the deployment and use of this technology throughout the system.
- Explore new applications and uses of this technology to better serve faculty, staff and students in this environment of collaboration.
- Explore and implement integration with other products/services, such as course management systems.

**Purpose:** Per the requirements of the State Career Technical Education Expenditure Plan (detailed under SB70, Scott) as developed through a multi-agency deliberative process and approved by the Department of Finance, the Chancellor’s Office is to facilitate extra-curricular reinforcement of career technical education programs. Although traditionally conducted by various student organizations, this innovative project seeks to build linkages with various professional organizations within career technical education occupational areas. The grant is to be awarded on a sole-source basis to Orange coast college, which has for number of years been competitively awarded and re-awarded statewide Perkins projects for student career development and support of work-based learning. By virtue of their eminence in running these statewide projects, Orange Coast College is deemed uniquely qualified to implement this ground-breaking initiative.

**Projected Funding for Subsequent Years:** Continued funding is dependent upon subsequent approval of annual expenditure plans and carryover funds available. Both factors are beyond the control and estimation of Chancellor’s Office program staff at the moment.

**STANDING ORDERS NOS. 318 AND 319  
OF THE BOARD OF GOVERNORS**

**318. Contracts.**

(a) Except as provided in subsection (b), whenever the power to contract is invested in the Board, or when, in the judgment of the Chancellor, such contracts are expressly or impliedly authorized to fulfill responsibilities or authorities vested in the Office of the Chancellor, the Chancellor is authorized in the name of the Board of Governors to enter into such contracts.

(b) The Chancellor shall secure Board approval before entering into any contract:

(1) In excess of \$100,000; or

(2) Over three years in duration; or

(3) With respect to consulting services, in excess of \$50,000.

The requirement for Board approval shall apply to any amendment of a contract, which results in the original contract exceeding the specified limits, as well as the amendment of a contract where the amendment itself exceeds the specified limits. Under circumstances when the need to contract was not foreseeable, and when delaying approval of the contract until the next Board meeting would jeopardize the contract or frustrate its purpose, the Chancellor shall have the authority to enter into contracts in excess of the limits specified in this subsection. Before entering into such contracts, however, the Chancellor shall consult with the President of the Board.

(c) In securing the approval of contracts by the Board pursuant to subsection (b), the Chancellor shall apply the following procedures:

(1) In determining the nature, extent and need for any such contract, the Chancellor shall provide a summary of the Request for Proposal (RFP), Invitation for Bid (IFB), or other summary of the purpose and need for a contract to the Board of Governors prior to publicly releasing any such RFP or IFB, or prior to making any informal commitment to contract. The Chancellor may proceed with the release of the RFP, IFB, or other contract negotiations, unless the Board President, with or without the advice of any appropriate Board Committee designated by the President, directs the Chancellor to withhold action within a 10 day period from the date the summary is provided.

(2) In developing language for such contracts, the Chancellor shall include a provision which allows any aggrieved bidder on an RFP or IFB to protest the awarding of a contract to the Chancellor. The Chancellor shall inform the Board of any such protests, including the results of such protests. This remedy shall be in addition to the bidder's right to protest the matter to the Department of General Services.

(3) The Chancellor shall ensure that each panel of evaluators who score proposals is made up of staff from more than one division in the Chancellor's Office, including outside evaluators as appropriate; and the Chancellor shall take such other steps as necessary to ensure that evaluations and scoring are objective and fair.

(4) In requesting approval of said contracts, the Chancellor shall, at the time of distributing each regular meeting agenda to the Board of Governors, include a summary of contracts for Board approval. The summary for each contract shall indicate: the purpose of the contract; the amount of the contract; the time for performance of the contract, including whether it was advertised as a multi-year contract; the number of proposals received or whether the contract is a

sole source contract; the number of proposals which met the minimum score for cost opening; and the party awarded the contract.

The provisions of subparagraphs (1) through (3) above shall not apply to interagency agreements with other state agencies, and other agreements necessary for the agency to receive public funds.

(d) The authorization contained in subsection (a) includes agreements, leases, contracts, and other documents, including but not limited to: service agreements, insurance agreements, fiscal, budgetary, and personnel documents, travel requests, contracts for the purchase of apparatus, furniture, equipment, supplies and books, as well as contracts entered into as necessary to receive federal funds allocated to the California Community Colleges, all within the limits of fiscal ability and sound budgetary controls and subject to such policies as may be established by the Board. (EC § 70901(b)(5).)

### **319. Grants.**

(a) Except as provided in subsection (b), whenever the power to enter into a grant is invested in the Board, or when, in the judgment of the Chancellor, a grant is expressly or impliedly authorized to fulfill responsibilities or authorities vested in the Office of the Chancellor, the Chancellor shall have the authority to enter into such grants.

(b) The Chancellor shall secure Board approval before entering into any grant:

- (1) In excess of \$100,000; or
- (2) Over three years in duration; or

The requirement for Board approval shall apply to any amendment of a grant, which results in the original grant exceeding the specified limits, as well as the amendment of a grant where the amendment itself exceeds the specified limits. Under circumstances when the need to enter into a grant was not foreseeable, and when delaying approval of the grant until the next Board meeting would jeopardize the grant or frustrate its purpose, the Chancellor shall have the authority to enter into grants in excess of the limits specified in this subsection. Before entering into such grants, however, the Chancellor shall consult with the President of the Board.

(c) Prior to submitting grants to the Board for approval pursuant to subsection (b), the Chancellor shall either:

- (1) present to the Board for its review and approval an expenditure plan outlining the nature, extent and need for any such grants; or
- (2) provide a summary of the Request for Application (RFA) or other summary of the purpose and need for a grant to the Board of Governors prior to publicly releasing any such RFA or prior to making any informal commitment to award a grant. The Chancellor may proceed with the release of the RFA unless the Board President, with or without the advice of any appropriate Board Committee designated by the President, directs the Chancellor to withhold action within a 10 day period from the date the summary is provided.

(d) All grants awarded by the Board of Governors or the Chancellor on or after January 1, 1996, shall be awarded through competitive processes or through allocation formulas reviewed and approved by the Board of Governors, except that:

- (1) Grants may be awarded competitively within regions.

(2) Grants for regional or statewide coordination activities for the Extended Opportunity Programs and Services (EOPS), Disabled Students Programs and Services (DSPS), Matriculation, and Economic Development programs need not be competitively bid.

(3) Where there are conditions beyond the control of the Chancellor which limit competition, such as matching fund requirements or other agencies being required to select grantees, the Chancellor, in consultation with the President of the Board and the Chairperson of the appropriate committee, shall have authority to award grants without competition.

(e) Panels evaluating or scoring grant proposals will include or be comprised of outside readers as appropriate and will be comprised so as to assure objectivity and prevent conflicts of interest. In the event that outside readers are not used, the evaluation panel shall be comprised of staff from more than one division in the Chancellor's Office. The Chancellor shall ensure that readers are appropriately trained with respect to the process for review of grant applications.

(f) Grants for the performance of functions which are ongoing in nature will be awarded in cycles of between one and five years in length. In advertising a grant for an ongoing function, district personnel will be apprised of the length of the cycle and the funding anticipated to be available for the duration of the project; provided however, that nothing in this Section shall be construed to preclude subsequent adjustment of actual funding levels to reflect unforeseen circumstances. Districts shall be further informed that continuance of the grant will depend on year-to-year funding, and continued satisfactory performance. The Chancellor shall have the authority to exempt grants described in Subsection (d)(2) or those awarded under the Mathematics, Engineering, and Science Achievement (MESA) program, the Middle College High School program, or the Puente project from the duration limitations imposed by this paragraph.

(g) A district which, prior to January 1, 1996, has been awarded a grant on a non-competitive basis for the performance of an ongoing function may continue to be awarded that grant, at the discretion of the Chancellor, for a period of up to three additional fiscal years. Retention of the grant shall depend on continued availability of funds and satisfactory performance. At the conclusion of the term, the grant for the ongoing function shall be awarded on a competitive basis.

(h) To the extent that a grantee contracts with a private or public entity to perform certain parts of the grant, the grantee shall be required to disclose the intended purpose and amount of such subcontracting, shall agree to follow locally applicable competitive bidding processes in doing such subcontracting, and shall agree to name the subcontractors chosen.

(i) The procedures specified above shall not apply to grants, which are distributed on an allocation formula basis, which has been reviewed and approved by the Board of Governors.
