

Chancellor's Office California Community Colleges

Executive Seminar: Prevention, Deterrence, and Response to Campus Emergencies

**Designed and Delivered by the National Center for Biomedical
Research and Training at Louisiana State University**

Successful prevention and deterrence of, response to, and recovery from incidents within the campus community are contingent upon campus and community leaders recognizing beforehand the importance of an integrated approach. *Executive Seminar: Prevention, Deterrence, and Response to Campus Emergencies* is designed to address campus emergencies associated with a spontaneous event requiring the attention of college officials, and other community stakeholders. The course consists of problem-based, small, integrated group activities which require a coordinated, integrated approach in order to solve.

Audience

College leaders, faculty governance, student governance, public safety, health services, public information officers

What Will be Covered:

- Integration of an emergency response to a campus incident
- Identification and descriptions of actions to be taken should an incident occur
- Coordination of a multi-agency response to a campus emergency utilizing the National Incident Management System (NIMS) and the Incident Command System (ICS)
- Critical roles of internal and external communications during a crisis
- Recognition and response to an active campus threat
- Practical techniques to address recovery issues on campus
- Additional resources for effective resolution of campus emergencies
