## DATA ELEMENT DICTIONARY

### Data Reporting Domains and Formats

#### STUDENT ENROLLMENT RECORD

Reporting Domain: The following record layout indicates the format in which the districts report student enrollment information. Report a record for each enrollment where (1) the enrollment resulted in attendance in a course as of the first census or later for daily or weekly census, or (2) the enrollment resulted in attendance in at least one meeting of a positive attendance class, or (3) the enrollment resulted in a notation on the student's official record. One record is submitted for each enrollment meeting these criteria during the reporting term.

The record length is 66 characters and the first two positions contain the record code "SX". The file with these records is submitted approximately one month following the end of the term.
