SUBJECT: CHANCELLOR'S OFFICE CURRICULUM INVENTORY 1.7.1 UPDATE

The Chancellor's Office was notified that the release of the 1.7.1 Update has been delayed. However, this release will be in the testing phase the week of February 11, 2018, with the deployment to occur shortly thereafter. While the California Community Colleges Technology Center was in the development phase of the 1.7.1 Update, they were able to identify and correct an issue with the quality check function during their testing phase, which is great news!

Rather than waiting for the 1.7.1 Update to be deployed, the [release notes](#) are being sent out now, so colleges can familiarize themselves with the technical fixes and improvements. Webinars will be held next week to demo the 1.7.1 Update. Participants will be able to visually see the changes and improvements, and have an opportunity to ask questions during the webinar. Additionally, a submission guide for best practices will be shared during the webinar and the on-demand webinar content. Please be sure to [register](#) as soon as possible.

The Chancellor's Office again would like to thank the colleges for their continued patience during the transition to the new curriculum inventory system. Please continue to report COCI issues to cociappsupport@openccc.zendesk.com. For questions, contact David Garcia at dgarcia@cccco.edu or at 916-322-4192.
