STATE AND NATIONAL GUIDANCE/EXECUTIVE ORDERS/NEWS

Gov. Gavin Newsom today gave an update on the state's response to the COVID-19 pandemic. (All news conferences are streamed *live at noon* on his [Twitter page](#) and the [California Governor Facebook page](#).) You can find more information on [California's COVID-19 website](#).

Among the headlines from today's update:

- Gov. Newsom began today's update by addressing President Trump's [recent executive actions](#), which call on states to absorb some responsibility to extend and pay for the weekly unemployment bonus that expired last month. The governor said [California is not in a position](#) to pay the potential costs, which his administration has estimated could cost as much as \$700 million per week.
- Speaking on evictions, the governor said three-fourths of renters who have fallen behind on rent payments are Black, African American and Latinx Californians. The existing eviction moratorium from the California Judicial Council could expire as soon as Friday, though Newsom said they have been working collaboratively with lawmakers and housing advocates to continue the eviction ban.
- The governor acknowledged the state's [trouble in collecting COVID-19 related data](#) and turned the news conference over to Health and Human Services Dr. Mark Ghaly, who officially announced the weekend [resignation](#) of California Department of Public Health Director Dr. Sonia Angell, one of several health officials [who have left or been let go amid the outbreak](#). Dr. Ghaly also announced 295,000 backlogged records were processed over the weekend through the [CalREDIE](#) system by accelerating test processing capacity over the weekend.
- California now has [554,160 confirmed cases](#) of COVID-19, resulting in 10,293 deaths. The number of COVID-19 related deaths across the state increased by 1% from Friday's total of 10,189.
- COVID-19 hospitalizations have decreased 19% and the number of ICU patients has decreased 13% over the past 14 days.

- The state has performed more than 8.8 million tests. The rate of positive tests over the past 14 days has holding at 6.1%.

[You can watch today's update here.](#) (Please note: it begins around the 2:20 mark.)

ICYMI: The state on Friday issued interim guidelines for colleges and universities so they can reduce risk if in-person instruction resumes. [Read the guidance here.](#)

The country marked another grim milestone over the weekend: The [number of cases topped 5 million](#) on Sunday, meaning that more than 1 million cases have been reported in the past 17 days alone. At least 159,000 people have died. Additionally, more than 97,000 U.S. [children tested positive](#) for the coronavirus in the last two weeks of July, more than a quarter of the total number of children diagnosed nationwide since March.
