## STATE AND NATIONAL GUIDANCE/EXECUTIVE ORDERS/NEWS

Gov. Gavin Newsom today gave an update on the state's response to the COVID-19 pandemic. (All news conferences are streamed *live at noon* on his [Twitter page](#) and the [California Governor Facebook page](#).) You can find more information on [California's COVID-19 website](#).

Among the headlines from today's update:

- The governor today focused on the state of the economy, saying the "most urgent economic recovery tool" for businesses is stabilizing the virus "to do everything in our power to mitigate the spread of COVID-19." Newsom detailed the actions his administration has taken to support the economy and said the state is working with the economic task force for workforce training to help put employees back to work.
- California now has [586,056 confirmed cases](#) of COVID-19, resulting in 10,648 deaths. The number of COVID-related deaths increased by 1.7 percent from Monday's total of 10,468.
- The state announced 11,645 new confirmed cases on Tuesday, though this number includes backlogged cases that would have been reported in earlier days and weeks and are not an accurate representation of cases reported in the prior 24 hours. Gov. Newsom said the actual number of new cases is around 5,400.
- The state has performed 9.3 million COVID-19 tests; the rate of positive tests over the last 14 days is 6.2 percent.
- The governor said a plan will be announced yet this week on closing the state's digital divide, including expanding access to broadband.

Gov. Newsom late Monday announced [actions to support diverse communities](#) disproportionately affected by COVID-19. Among the new initiatives is a coalition of 10 philanthropies that have committed \$18.8 million to support local public health departments in building a culturally and linguistically competent contact tracing workforce.
