Among the headlines from today's update:

- The state on Tuesday reported 11,694 new coronavirus cases – the highest single increase to date – though the governor noted the number includes a backlog of around 2,000 cases from Los Angeles, so the actual number is likely lower than 10,000.
- California's positivity rate continues to climb, hitting 7.1% over the last 14 days.
- Hospitalizations are up 44% statewide over the past two weeks, though Gov. Newsom said hospital capacity remains at only 8%.
