DID YOU KNOW…

Tracking client relationships is important, thus the need for a customer relationship management system (CRM). A CRM will track communication with present and potential clients, as well as generating your pipeline report. Data can be collected in your CRM and data-driven reports produced. As your number of clients and leads grows, it becomes more critical to have a software system all Contract Education staff can access and use to store documents like proposals and contracts, as well as use for digital marketing communication. It is good to have one or more staff trained in how to get the best out of your CRM.
