INFORMATIVE DIGEST

The Board of Governors of the California Community Colleges proposes regulatory amendments to certain provisions of title 5 of the California Code of Regulations related to excused withdrawals (EW) and Pass-No Pass grading options.

Pass-No Pass Regulation Changes

The proposed changes to title 5, section 55022, stem from Executive Order 2020-02, which temporarily suspended various grade-related regulations in response to the COVID-19 pandemic. Upon review of the Spring 2020 enrollment, persistence, and completion data, and the strategies utilized to support student retention, system stakeholders questioned the purpose, function, and benefit of the time constraints for selecting a Pass-No Pass grading option. Stakeholders also continued to acknowledge that community college students, who balance multiple competing priorities and demands, may find themselves in crisis outside of the COVID-19 context and choose to drop a course rather than attempt to persist due to these same concerns.

In consultation with system stakeholders, the proposed regulation changes extend the allowable time period for students to select the Pass-No Pass grading option up to the last day of instruction. These changes would provide students with greater grading flexibility and support student persistence during periods of time when external constraints present barriers. These changes will also assist students with preserving or maintaining their GPA.

As part of this regulation change, title 5 sections 55022, 55000, 55023, 55031, 55032, 55033, of the California Code of Regulations are also included with minor, non-substantive changes to bring them into alignment with the proposed substantive changes.

Excused Withdrawals Regulation Changes

Executive Order 2020-01, temporarily suspended student withdrawal regulations during the COVID-19 pandemic related to the use of the “EW” grading symbol.
The flexibility to provide excused withdrawals surfaced regulatory discrepancies between regulations detailing two distinct types of emergency scenarios, “extraordinary conditions” and “extenuating circumstances”. A withdrawal related to an extraordinary condition is primarily connected to external factors that can impact both the college and the student. A classic example would be a fire that closes a campus. With respect to the student, this type of withdrawal involves a fee refund and allows for repeatability, and for the college, there is no limit on claiming apportionment, and an emergency condition allowance may apply. A withdrawal due to extenuating circumstances is more student focused and limits repeatability and apportionment. An added complication is that the general withdrawal regulation allows for both a “withdrawal” and an “excused withdrawal,” but they have different outcomes even though they are both tied to an extenuating circumstances. The intent of the proposed regulation change is to align these two regulatory schemes to reduce confusion and administrative burdens by providing that:

1. State aid and repeatability rules are the same for withdrawals under both types of emergency situations; and
2. withdrawals for extenuating circumstances are all treated as excused withdrawals.

Proposed regulation changes related to withdrawals for extraordinary conditions include the following:

- Change section 58509 to more accurately reflect the purpose of the regulation.
- Remove language in section 58509, subdivision (a)(2) that purports to exclude apportionment for colleges when students withdraw due to an extraordinary condition as this language conflicts with section 58161.
- Delete section 58509, subdivision (b) because it is duplicative.
- Delete section 58509, subdivision (c) related to waiver, and create a new section, 58509.1.
- Add pandemics to list of extraordinary conditions in section 58146.
- Modify the definition of extraordinary conditions.
- Add a provision allowing the college to record an “EW” grading symbol when a student withdraws from a course due to an extraordinary condition.

Proposed regulation changes related to withdrawals for extenuating circumstances include the following:
• Eliminate "W," or withdrawal, for extenuating circumstances and follow the EW subdivision.
• Modify the verification requirements to focus on college efforts to mitigate withdrawal.
• Delete limits on apportionment and repeatability in section 58161, similar to section 58509 and extraordinary conditions.

ESTIMATED COST OR SAVINGS OF PROPOSED AMENDMENTS

The estimated cost or savings of the proposed amendments are anticipated to be as follows:

Mandate on local agencies or community college districts: None.

Cost or savings to state agencies: None.

Costs to local agencies or community college districts for which reimbursement would be required pursuant to part 7 (commencing with section 17500) of division 4 title 2 of the Government Code: None.

Other non-discretionary cost or savings imposed on community college districts: None.

Cost or savings in federal funding to state agencies: None.

The proposed amendments to title 5 would result in no fiscal impact to local or state governments, nor will it have any fiscal impact on any federal funding.
