

Proposed Revisions to Title 5, Section 55063. Minimum Requirements for the Associate Degree (Ethnic Studies Requirement)

This document contains underline and strikethrough text, which may require adjustments to screen reader settings.

SECTION 55063 OF ARTICLE 6 OF SUBCHAPTER 1 OF CHAPTER 6 OF DIVISION 6 OF TITLE 5 OF THE CALIFORNIA CODE OF REGULATIONS IS REPEALED AND ADOPTED TO READ:

~~§ 55063. Minimum Requirements for the Associate Degree.~~

~~The governing board of a community college district shall confer the associate degree upon a student who has demonstrated competence in reading, in written expression, and in mathematics, and who has satisfactorily completed at least 60 semester units or 90 quarter units of degree-applicable credit course work (as defined in section 55002(a)) which falls into the categories described in section 55062. A college may also accept toward satisfaction of this requirement courses that were not completed at a California community college that would reasonably be expected to meet or exceed the standards of section 55002(a).~~

~~Effective for all students admitted to a community college for the Fall 2019 term or any term thereafter, competence in written expression shall be demonstrated by obtaining a satisfactory grade in an English course at the level of the course typically known as Freshman Composition (either Freshman Composition or another English course at the same level and with the same rigor, approved locally) or by demonstrating competency that is comparable to satisfactory completion of the specified English course, determined locally. Satisfactory completion of an English course at the level of Freshman Composition shall satisfy both this competency requirement and the coursework requirement set forth in subdivision (b)(1)(D)(i) of this section.~~

~~Effective for all students admitted to a community college for the Fall 2019 term or any term thereafter, competence in mathematics shall be demonstrated by obtaining a satisfactory grade in a mathematics course at or above the level of the course typically known as Intermediate Algebra (either Intermediate Algebra or another mathematics course at or above the same level, with the same rigor and with Elementary Algebra as a prerequisite, approved locally) or by demonstrating competency that is comparable to satisfactory completion of a mathematics course at or above the level of the course typically known as Intermediate Algebra, determined locally. Satisfactory completion of a mathematics course at or above the level of Intermediate Algebra shall satisfy both this competency requirement and the coursework requirement set forth in subdivision (b)(1)(D)(ii) of this section.~~

~~The competency requirements for written expression and mathematics may also be met by obtaining a satisfactory grade in courses in English and mathematics taught in or on~~

behalf of other departments and disciplines, and which, as determined by the local governing board, require entrance skills at a level equivalent to those necessary for Freshman Composition and Intermediate Algebra respectively. Requirements for demonstrating competency in reading shall be locally determined.

The required 60 semester or 90 quarter units of course work must be fulfilled in a curriculum accepted toward the degree by a college within the district (as shown in its catalog). It must include at least 18 semester or 27 quarter units in general education and at least 18 semester or 27 quarter units in a major or area of emphasis as prescribed in this section. Of the total required units, at least 12 semester or 18 quarter units must be completed in residence at the college granting the degree. Exceptions to residence requirements for the associate degree may be made by the governing board when it determines that an injustice or undue hardship would be placed on the student.

(a) Requirements for a major or area of emphasis.

(1) At least 18 semester or 27 quarter units of study must be taken in a single discipline or related disciplines, as listed in the community colleges "Taxonomy of Programs," or in an area of emphasis involving lower division coursework which prepares students for a field of study or for a specific major at the University of California or the California State University.

(2) Effective for all students admitted to a community college for the Fall 2009 term or any term thereafter, each course counted toward the unit requirement of this subdivision must be completed with a grade of C or better or a "P" if the course is taken on a "pass no pass" basis.

(b) General Education Requirements.

(1) Students receiving an associate degree shall complete a minimum of 18 semester or 27 quarter units of general education coursework which includes a minimum of three semester or four quarter units in each of the areas specified in paragraphs (A), (B) and

(C) and the same minimum in each part of paragraph (D). The remainder of the unit requirement is also to be selected from among these four divisions of learning or as determined by local option:

(A) Natural Sciences. Courses in the natural sciences are those which examine the physical universe, its life forms, and its natural phenomena. To satisfy the general education requirement in natural sciences, a course shall be designed to help the student develop an appreciation and understanding of the scientific method, and encourage an understanding of the relationships between science and other human activities. This category would include introductory or integrative courses in astronomy, biology, chemistry, general physical science, geology, meteorology, oceanography, physical geography, physical anthropology, physics and other scientific disciplines.

(B) Social and Behavioral Sciences. Courses in the social and behavioral sciences are those which focus on people as members of society. To satisfy the general education requirement in social and behavioral sciences, a course shall be designed to develop an

awareness of the method of inquiry used by the social and behavioral sciences. It shall be designed to stimulate critical thinking about the ways people act and have acted in response to their societies and should promote appreciation of how societies and social subgroups operate. This category would include introductory or integrative survey courses in cultural anthropology, cultural geography, economics, history, political science, psychology, sociology and related disciplines.

(C) Humanities. Courses in the humanities are those which study the cultural activities and artistic expressions of human beings. To satisfy the general education requirement in the humanities, a course shall be designed to help the student develop an awareness of the ways in which people throughout the ages and in different cultures have responded to themselves and the world around them in artistic and cultural creation and help the student develop aesthetic understanding and an ability to make value judgments. Such courses could include introductory or integrative courses in the arts, foreign languages, literature, philosophy, and religion.

(D) Language and Rationality. Courses in language and rationality are those which develop for the student the principles and applications of language toward logical thought, clear and precise expression and critical evaluation of communication in whatever symbol system the student uses. Such courses include:

(i) English Composition. Courses fulfilling the written composition requirement shall be designed to include both expository and argumentative writing. Such courses may be taught in disciplines such as, but not limited to, English and English as a Second Language.

(ii) Communication and Analytical Thinking. Courses fulfilling the communication and analytical thinking requirement including, but not limited to oral communication, mathematics, and quantitative reasoning such as logic, statistics, computer languages and programming, and related disciplines.

(2) Ethnic Studies will be offered in at least one of the areas required by subdivision (1).

(c) While a course might satisfy more than one general education requirement, it may not be counted more than once for these purposes. A course may be used to satisfy both a general education requirement and a major or area of emphasis requirement. Whether it may be counted again for a different degree requirement is a matter for each college to determine. Students may use the same course to meet a general education requirement for the associate degree and to partially satisfy a general education requirement at the California State University or University of California, if such course is accepted by that system to satisfy a general education requirement.

(d) For the purpose of this section, "satisfactorily completed" means either credit earned on a "pass-no pass" basis or a grade point average of 2.0 or better in community college credit courses in the curriculum upon which the degree is based.

Note: Authority cited: Sections 66700 and 70901, Education Code. Reference: Sections 70901 and 70902, Education Code.

§ 55063. Minimum Requirements for the Associate Degree.

The governing board of a community college district shall confer the associate degree upon a student who has met all requirements of this section.

(a) General unit requirements.

(1) The associate degree requires satisfactory completion of at least 60 semester units or 90 quarter units of degree-applicable credit course work accepted by the degree-granting college. Courses completed at other institutions that meet or exceed the standards of the California Community Colleges may be counted toward associate degree unit requirements. At least 12 semester or 18 quarter units must be completed in residence at the degree-granting college, unless the governing board excuses this requirement to alleviate injustice or undue hardship.

(2) "Satisfactory completion" means either credit earned on a "pass-no pass" basis, or with a grade point average of 2.0 or better in the associate degree community college credit courses.

(b) Major or area of emphasis requirement.

(1) A minimum of 18 semester units or 27 quarter units must be taken in a single discipline, or related disciplines, as listed in the community college's "Taxonomy of Programs," or in an area of emphasis involving lower division coursework to prepare students for a field of study or major at the University of California, or the California State University.

(2) For all students admitted to a community college for the Fall 2009 term or any term thereafter, each course counted toward the unit requirement of this subdivision must be completed with a grade of C or better or a "P" if the course is taken on a "pass-no pass" basis.

(c) General Education Requirements. A minimum of 18 semester units or 27 quarter units of general education coursework must be completed in the areas described in this subdivision (c), or as otherwise determined by the degree-granting college.

(1) Natural Sciences. Courses in the natural sciences examine the physical universe, its life forms, and its natural phenomena. Such courses help students appreciate and understand the scientific method, and understand the relationships between science and other human activities. This category includes introductory or integrative courses in astronomy, biology, chemistry, general physical science, geology, meteorology, oceanography, physical geography, physical anthropology, physics, and other scientific disciplines. A minimum of three semester or four quarter units must be completed in this area.

(2) Social and Behavioral Sciences. Courses in the social and behavioral sciences focus on people as members of society. Such courses develop awareness of the method of inquiry used by the social and behavioral sciences. They stimulate critical thinking about the ways people act and have acted in response to their societies, and promote appreciation of how societies and social subgroups operate. This category includes introductory or integrative survey courses in cultural anthropology, cultural geography, economics,

history, political science, psychology, sociology, and related disciplines. A minimum of three semester or four quarter units must be completed in this area.

(3) Humanities. Courses in the humanities study the cultural activities and artistic expressions of human beings. Such courses develop awareness of the ways in which people throughout the ages, and in different cultures, respond to themselves and the world around them in artistic and cultural creation, and develop aesthetic understanding and an ability to make value judgments. Such courses include introductory or integrative courses in the arts, foreign languages, literature, philosophy, and religion. A minimum of three semester or four quarter units must be completed in this area.

(4) Language and Rationality. Courses in language and rationality develop the principles and applications of language toward logical thought, clear and precise expression, and critical evaluation of communication in whatever symbol system the student uses. This includes courses in both English Composition, and Communication and Analytical Thinking as follows:

(A) English Composition. Courses fulfilling the written composition requirement include both expository and argumentative writing, and may be taught in disciplines including, but not limited to, English and English as a Second Language. A minimum of three semester or four quarter units must be completed in this area.

(B) Communication and Analytical Thinking. Courses fulfilling the communication and analytical thinking requirement include, but are not limited to, oral communication, mathematics, and quantitative reasoning courses such as logic, statistics, computer languages, programming, and related disciplines. A minimum of three semester or four quarter units must be completed in this area.

(d) Additional Requirements. The associate degree also requires demonstrated competence in reading, written expression, and mathematics, and satisfactory completion of a course in ethnic studies, as follows:

(1) Satisfactory completion of a course in English at the level of the course typically known as Freshman Composition. This requirement may also be met by satisfactory completion of an English course taught in another department or discipline that requires entrance skills at a level equivalent to those for Freshman Composition, or by demonstrating competency that is comparable to satisfactory completion of a specified English course. The equivalence of English coursework, and the methods of demonstrating comparable competency in written expression and reading is determined by the college/district.

(2) Satisfactory completion of a course in mathematics at or above the level of the course typically known as Intermediate Algebra (either Intermediate Algebra or another mathematics course at or above the same level, with the same rigor, and with Elementary Algebra as a prerequisite, approved locally). This requirement may also be met by satisfactory completion of a mathematics course taught in another department or discipline that requires entrance skills at a level equivalent to Intermediate Algebra, or by demonstrating competency that is comparable to satisfactory completion of a mathematics course at or above the level of the course typically known as Intermediate

Algebra. The equivalence of mathematics coursework, and the method of demonstrating comparable competency in mathematics is determined by the college/district.

(3) Satisfactory completion of a transfer-level course (minimum of three semester units or four quarter units) in ethnic studies. This requirement may be satisfied by obtaining a satisfactory grade in a course in ethnic studies taught in or on behalf of other departments and disciplines.

(e) A course may satisfy more than one general education requirement, but course completion may be counted only once toward satisfying the 18 semester unit or 27 quarter unit general education requirement. A course may also satisfy both a general education requirement and a major or area of emphasis requirement, and course completion may be counted toward both requirements, depending upon college/district policy. Students may use the same course to meet a general education requirement for the associate degree, and to satisfy a general education requirement at the California State University or the University of California, if such course is accepted by that system to satisfy a general education requirement.
