

Motivate Lab  
**Learning  
Mindsets**

*September 8th 2023*

SCHOOL of EDUCATION  
and HUMAN DEVELOPMENT

*Motivate Lab*

# Who We Are

# Our Motivate Lab Team

**LADONNA YOUNG**

Senior Director,  
Strategic Partnerships,  
Development & Equity

**DUSTIN THOMAN**

California Research  
Director

**MARCUS KOLB**

Project Manager

**CHRIS HULLEMAN**

Lab Director  
Associate Professor  
*University of Virginia*

# Motivate Lab Mission

To improve people's lives through rigorous motivation research.

# Motivate Lab Mission

**To improve people's lives through rigorous motivation research.**

# Motivate Lab Mission

To improve people's lives **through rigorous** motivation research.

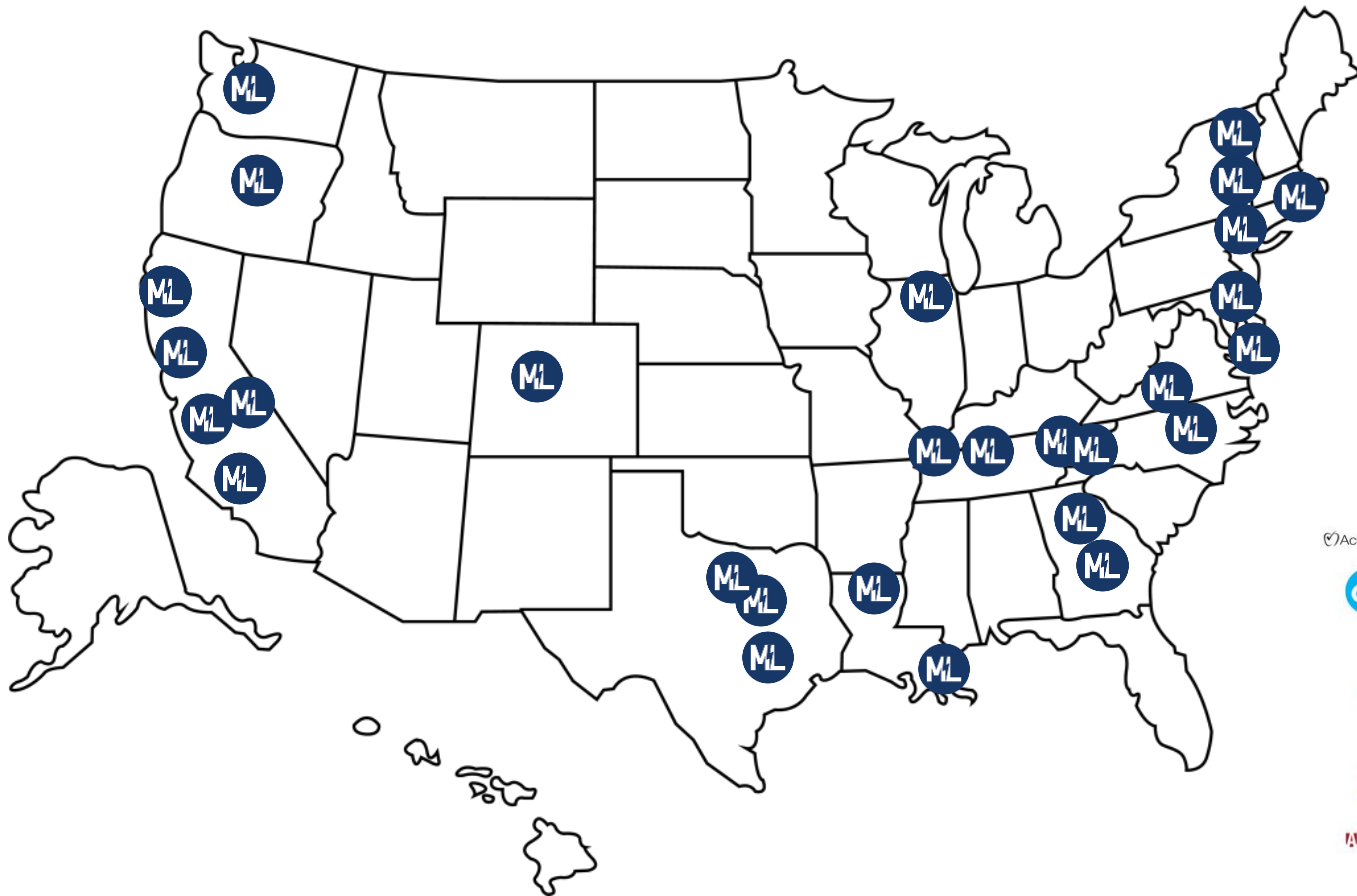

# Motivate Lab Mission

To **reduce systemic inequity** through rigorous **motivation research**.

# Motivate Lab Partners: 65 and Counting!

*Learning Mindsets*

# What We Do

# Our Process

# Learning Mindsets

Students' beliefs about themselves as learners and their learning environment.

**G**

## **Growth Mindset**

Belief that intelligence can be developed through hard work, the use of effective strategies, and help from others when needed.

**P**

## **Purpose and Relevance**

The belief that one's schoolwork is valuable because it is connected to a larger purpose and/or relevant to one's life.

**S**

## **Sense of Belonging**

Belief that one is connected to and respected by peers, cared for by teachers and mentors, and fits in with the culture.

**Can I do this?**

**Do I want to do this?**

**Do I belong here?**

# Why Focus on Learning Mindsets?

## Meaningful

Related to academic success and students' well-being

## Measurable

Can be assessed and tracked

## Malleable

Can be altered through targeted activities and changes in the educational context

## More Effective

Learning mindset interventions can be particularly powerful and improve outcomes for students from traditionally marginalized groups (e.g., Black, Latine, Indigenous, 1<sup>st</sup> generation)

# Enhance the Quality of the *Psychological Air*

*Mindset GPS*

# Why it Matters

# Do you know these students?

G

Mia

"I'm not good at math and I never will be."

P

Grace

"I can read and write! Why am I in this class?"

S

Carlos

"I'm not sure I fit in this class. Would anyone notice or care if I left?"

# Our Research

In our most recent work with the Tennessee Board of Regents and the University System of Georgia, we studied **how learning mindsets relate to academic outcomes and how they may be particularly effective for supporting students enrolled in corequisite courses** — particularly those who have been systematically marginalized by the higher education system.

# What We Have Found

## Learning mindsets matter in corequisite courses

G

"Remedial" courses may convey messages to students that they do not "have what it takes" to succeed in math, for example, leading to **discouragement** and **students seeing themselves as someone who is not capable of learning math.**

P

Being forced to take college courses for no credit creates an additional **structural barrier** for students related to the affordability of higher education.

S

Belonging uncertainty creates **greater difficulties** for corequisite students than non-corequisite students.

Mia

"I'm not good at math and I never will be."

Grace

"I can read and write! Why am I in this class?"

Carlos

"I'm not sure I fit in this class. Would anyone notice or care if I left?"

# What We Have Found

Mindset GPS correlation to GPA in corequisite courses

# What We Have Found

Our messages matter more to students in corequisite courses

Students who **perceived their faculty as endorsing more of a growth mindset:**

- Attained higher GPAs than students who perceived their faculty as endorsing less of a growth mindset
- Achieved higher passing rates in their lead course than students who perceived their faculty as having lower growth mindset

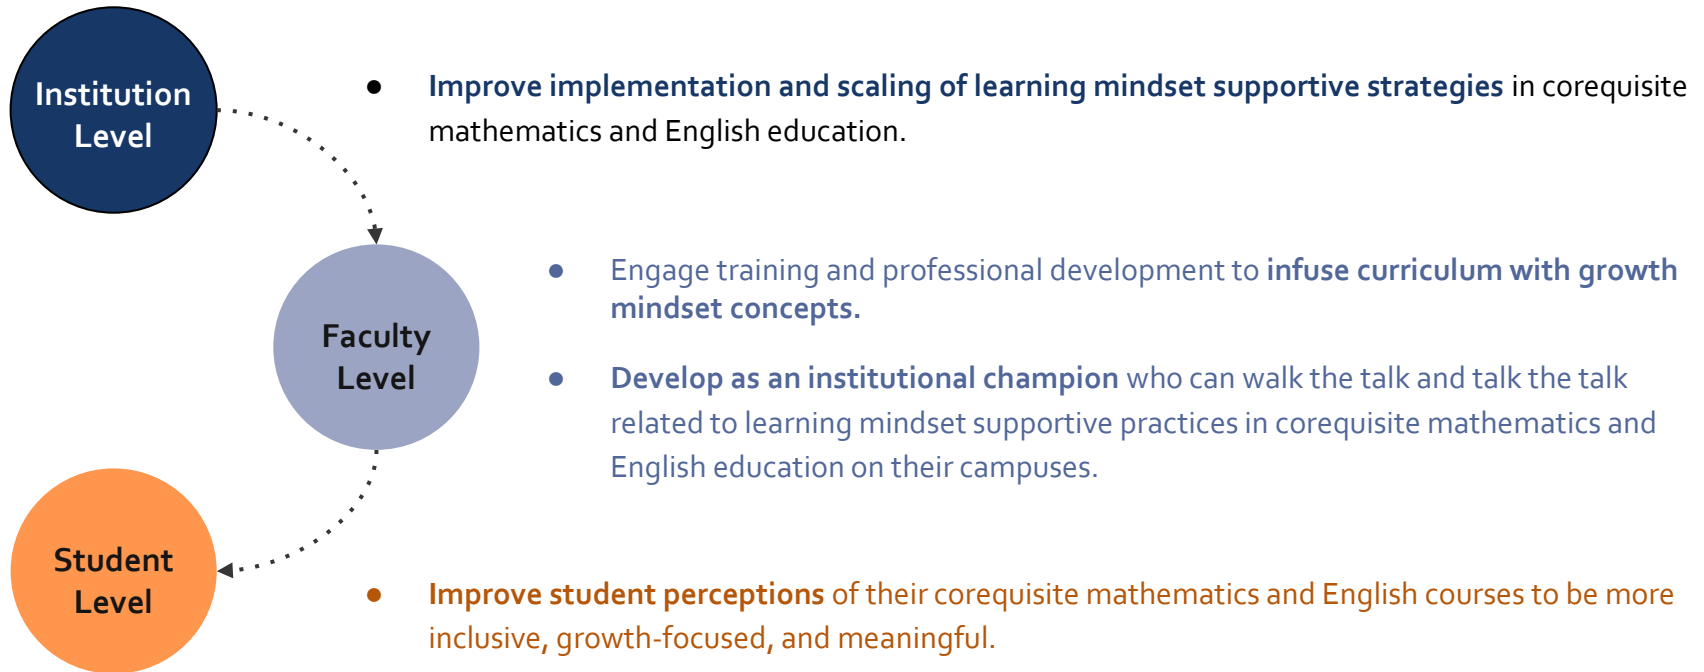

*Program Overview*

# How We Can Work Together

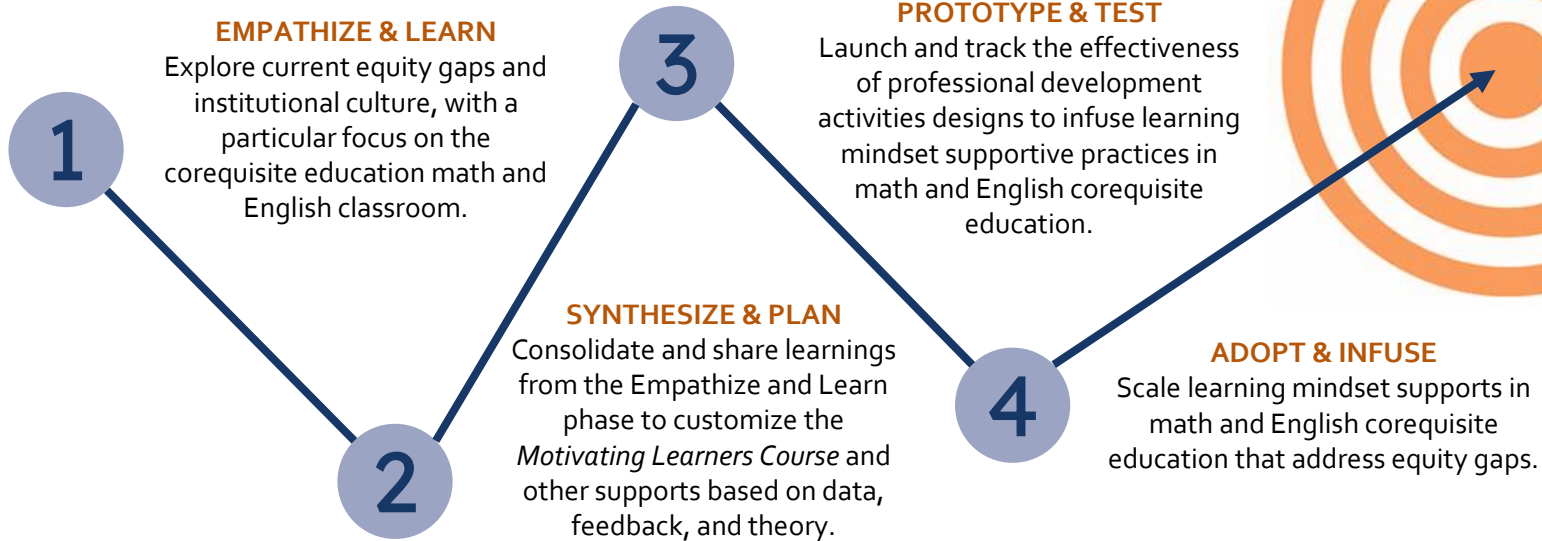

# The Opportunity

## Addressing systems change in corequisite education

# Project Outcomes

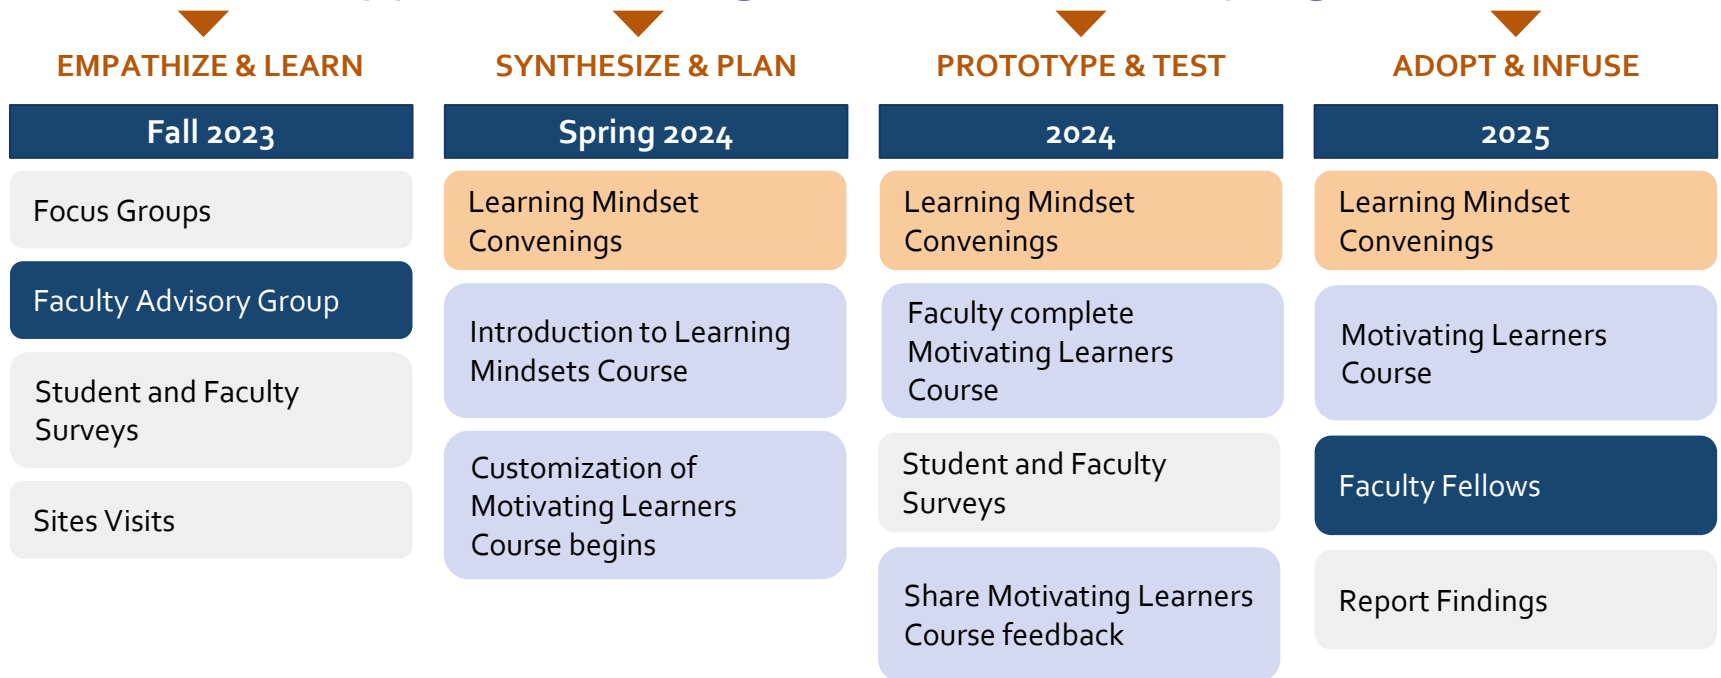

An iterative approach to scale learning mindset practice in math and English corequisite education

# Project Overview

An iterative approach to design a customized PD program

# The Commitment

What faculty should expect

Task
Time Investment

Share

<b>Focus Groups &amp; Site Visits</b>	<b>Surveys</b>
