**RE: Report on California Community Colleges Allied Health Programs Clinical Placement Report for 2023-24**

Dear Secretary Contreras:

Pursuant to California Education Code Section 88826.5, the California Community Colleges Chancellor's Office and the Board of Governors for California Community Colleges are pleased to release the report pertaining to the Allied Health Programs within California community colleges for academic year 2023-24.

As required by Code, this comprehensive report encompasses details on clinical placements, categorized by program and occupation. It includes licensing information for each clinical training site, the number of students participating at each clinical training site, and student proficiency in languages other than English.

If there are any questions about this report, please contact Vice Chancellor Anthony Cordova at [ACordova@cccco.edu](mailto:ACordova@cccco.edu).

Sincerely,

A handwritten signature in black ink that reads "Sonya Christian". The signature is fluid and cursive, with the first name "Sonya" and last name "Christian" clearly legible.

Sonya Christian, Chancellor

## EXECUTIVE SUMMARY

In September 2018, the California Legislature passed [Senate Bill \(SB\) 1348](#), which requires the California Community College Chancellor's Office (Chancellor's Office) to report additional information about clinical placements for degree and certificate programs in allied health. The reporting requirements began with seven programs in 2019-2020, affecting 134 individual programs at 80 individual community colleges across the state. Nine additional programs were added to the reporting requirement in 2020-2021, with all remaining allied health programs included in 2021-2022.

This report details the data collected for allied health occupational programs, each reported using a unique Taxonomy of Programs (TOP) Code. The programs included have at least one educational program or one student enrolled in credit courses at a California community college. Specifically, of the 44 Top Codes identified, only 34 allied health program reports were received. This represents a 44% decrease in the number of colleges that reported compared to the previous year. Additionally, there is currently no Top Code assigned for the Dialysis Technician program.

The lack of submissions from certain programs significantly contributed to incomplete Top Code information. Furthermore, while we have received reports for some Top Codes, not every college associated with those codes submitted data. As a result, the current information does not fully reflect clinical site placements across all programs and institutions.

To address these reporting gaps, the program will make an effort to determine the reasons behind non-reporting and to develop strategies for improving future data collection and compliance.

## BACKGROUND

SB 1348: Postsecondary education: allied health professional clinical programs: reporting became law in September 2018. It introduced new reporting requirements focused on generating data about clinical placements for educational providers that offer degree or certificate programs across the allied health professions in California. The statute reflects the division in oversight between California's public and private universities: Section 1 of the new law targets community colleges in the state regulated by the California Department of Education, and Section 2 targets private institutions regulated by the California Bureau for Private Postsecondary Education within the California Department of Consumer Affairs. While the requirements in the two sections are similar in their overall objective, the reporting requirements for California Community Colleges covered in Section 1 are significantly less comprehensive than those required of private institutions. As the California Community Colleges Chancellor's Office is issuing this report, the report will focus exclusively on impacts Senate Bill 1348 will have on California community colleges, as defined in Section 1.

## REPORTING REQUIREMENTS FOR CALIFORNIA COMMUNITY COLLEGES INTRODUCED BY SENATE BILL 1348

SB 1348 requires that the Chancellor's Office report data describing the number of students receiving clinical training at individual clinical sites on an annual basis. For purposes of standardization, specific requirements about how to identify the clinical sites are included in

the legislation. The data collection requirements are as follows:

1. Counts of clinical trainees by site
  - 1.1. “The number of students participating at each clinical training site.”
    - 1.1.1. “This shall include information about proficiency in languages other than English.”
2. Identifying information about clinical sites
  - 2.1. “License number of each clinical site”
    - 2.1.1. “If the license number is not available, the report shall include the employer identification number of the clinical training site.”

Section 1, “c” mandates that all disclosures be done in compliance with all applicable state and federal privacy laws. As presented above, collection of the data required for compliance does not require links to individual identifiers and can be accomplished without triggering additional data security and privacy measures.

This report details the data collected for 34 occupations, each reported as a unique Taxonomy of Programs (TOP) Code. These occupations represent a broad variety of skill levels, educational attainment, and economic achievement. The programs included in this report have at least one educational program or students enrolled in credit courses at a California community college.

Table 1 lists the occupations included in this report along with their educational program name and TOP codes.

The following pages will offer a brief profile of each occupation along with relevant data. The language data reported for each clinical site does not indicate the number of students at the site. Instead, it represents the languages that students have self-reported as proficient.

The table will present the data reported using the following format:

- Each clinical site reported and their license number or EIN (as available).
- The total number of students at the clinical placement site for the 2023-24 program year, and information about proficiency in languages other than English.

The following sources were also used to describe each program:

- DataMart – the number of programs in the California Community College, indicated by Community College Pipeline – the number of students enrolled in credit courses related to the occupation, indicated by use of \*\*.

## OCCUPATION TITLE: SUBSTANCE ABUSE, BEHAVIORAL DISORDER, AND MENTAL HEALTH COUNSELORS

Substance Abuse, Behavioral Disorder, and Mental Health Counselors are paraprofessionals who advise people who suffer from alcoholism, drug addiction, eating disorders, or other behavioral problems. They provide treatment and support to help the client recover from addiction or modify problem behaviors.

**TABLE 2: TOP CODE 2104.40 – ALCOHOL AND CONTROLLED SUBSTANCES**

Alcohol and Controlled Substances represent 41 programs in the California Community Colleges, with 8,198 students enrolled in credit courses related to this occupation. For this reporting period, three unique colleges reported 83 clinical placements. Among the clinical placements, languages other than English included American Sign Language, Chinese, Spanish, Tagalog, and Other.
