

# AB 1705 STEM Calculus Pathway Placement and First Math Course Enrollment Analysis: Mt. San Jacinto College

April 6, 2024

**Purpose:** This analysis is provided by the state Chancellor’s Office and The RP Group to support colleges in AB 1705 validation of placement policies and enrollment practices for the STEM Calculus pathway. The analysis presented here uses your college’s data to replicate the statewide analysis presented in the report [Preparatory Pathways and STEM Calculus Completion: Implications of the AB 1705 Standards](#). Please use this data to inform your AB 1705 planning and certification decisions. Colleges may choose to submit local data by July 1, 2024. Questions about your college’s data or this analysis can be submitted to [ab705@cccoco.edu](mailto:ab705@cccoco.edu).

## **i** Summary of Mt. San Jacinto College Analysis

For the cohorts of STEM Majors analyzed in this report, we offer the following observations. Observations based on an analysis of ALL students who start in preparatory courses in the STEM Calculus pathway, rather than the subset of STEM majors, may differ.

- Lowest STEM Placement students who started in STEM Calculus 1 at your college were not “highly unlikely to succeed.” (STEM Calculus 1 completion is greater than 15%.)
- Lowest STEM Placement students who started in any preparatory course in the STEM Calculus Pathway at your college had lower STEM Calculus 1 completion (throughput) in two years than those who started in STEM Calculus 1.
- Less than 50% of Lowest STEM Placement students who started in any preparatory course completed STEM Calculus 1 in two years.
- Students in the higher placement group who started in a preparatory course prior to STEM Calculus 1 were repeating coursework that they previously passed in high school, which is no longer permitted under AB 1705.
- The data provided in this report do not provide evidence that placement and enrollment practices for the STEM Calculus pathway at your college meet AB 1705 standards. Based on this analysis, this report does not support validation approval status or interim approval status for any preparatory course currently offered by your college in the STEM Calculus pathway.

Please refer to the guidance memo **ESLEI 24-15** for your options and next steps.

## **Operationalizing AB 1705 STEM standards for local validation:**

For this analysis, we define a Lowest STEM Placement group to identify students who may be highly unlikely to succeed if they take STEM Calculus 1 as their first math course and for whom additional

transfer-level preparation may improve the probability that they persist to and successfully complete STEM Calculus 1 and Calculus 2.

**Lowest STEM Placement group:** Students who have not passed high school trigonometry, precalculus or calculus with a C or better OR have a HS GPA  $\leq 2.6$ .

**A preparatory course in the STEM Calculus pathway is validated as compliant with AB 1705 standards when all of the following are true:**

1. Lowest STEM Placement students are highly unlikely to succeed in STEM Calculus 1 if they start in STEM Calculus 1. (Calculus 1 throughput in two-years is less than 15%.)
2. Lowest STEM Placement students have a higher STEM Calculus 1 throughput in two-years when starting in the preparatory course compared to starting in Calculus 1.
3. Lowest STEM Placement students have a higher STEM Calculus 2 throughput in two-years when starting in the preparatory course compared to starting in Calculus 1.

**A preparatory course in the STEM Calculus pathway has interim status when:**

The Lowest STEM Placement students who start in the preparatory course have a STEM Calculus 1 throughput in two years of 50% or greater.

## Methodology

The analysis below is based on data your college reported to the California Community College's Chancellor's Office's Management Information System (COMIS) and CCCApply. The cohort (labeled All Students) includes non-dual enrolled students at your college with a Degree/Transfer or Undecided education goal whose first math course was a transfer-level course in the STEM Calculus pathway in the academic years 2019-2020, 2020-2021, or Fall 2021, excluding those starting in summer. STEM majors are a subset of the All Students cohort. See Additional Methodology notes at the end of this report for more information on the definition and identification of STEM majors.

Because AB 1705 connects STEM Calculus completion with transfer-level math placement and initial math enrollment, the analysis uses throughput as the outcome metric. Calculus throughput rate (TR %) is the percentage of students who successfully complete (C or better) STEM Calculus 1 or 2 within a given timeframe out of the count who started in a specified course in the calculus pathway. Students were tracked to determine whether they completed STEM Calculus 1 within two years and STEM Calculus 2 within three years, anywhere within the community college system.

STEM Calculus 1 is a course equivalent to C-ID Math 210, 211 or the first half of Math 900S. STEM Calculus 2 is a course equivalent to C-ID Math Math 220, 221 or the second half of Math 900S. The identification of STEM majors requiring STEM Calculus was based on C-ID Transfer Model Curricula (TMC).

Additional information about the methodology is provided at the end of this document.

## Analysis

**Table 1. Student Headcount by Cohort Year**

To allow for two-year throughput calculations, 2019-2020, 2020-2021, and Fall 2021 cohorts were used. The cohort is All Students, which is students who demonstrated STEM intent by starting math in a transfer-level course in the college's path to STEM Calculus 1. STEM Majors are a subset of All Students.

Cohort	STEM Majors	All Students
2019-2020	218	949
2020-2021	259	1,164
Fall 2021	222	947
Total	699	3,060

**Table 2. Student Headcount by First CCC Math Course**

First CCC Math	STEM Majors	All Students
College Algebra	407	2,247
Precalculus	168	451
STEM Calculus 1	124	362
Total	699	3,060

\* Data is suppressed in throughput tables below if  $n < 10$ . Table 5 provides details on the courses included and their categorization in the RP Group Math Typology.

**Table 3. Two-Year STEM Calculus 1 Throughput by First CCC Calculus Pathway Course**

	First CCC Math	STEM Majors		All Students	
		Cohort	2-Yr TR %	Cohort	2-Yr TR %
Lowest STEM Placement Group	College Algebra	296	15%	1,604	6%
	Precalculus	97	41%	253	30%
	STEM Calculus 1	12	92%	26	77%
All Higher Placements	College Algebra	111	9%	643	7%
	Precalculus	71	35%	198	30%
	STEM Calculus 1	112	84%	336	81%

\* Data is suppressed if  $n < 10$ .

**Figure 1. Two-Year STEM Calculus 1 Throughput by First CCC Calculus Pathway Course**

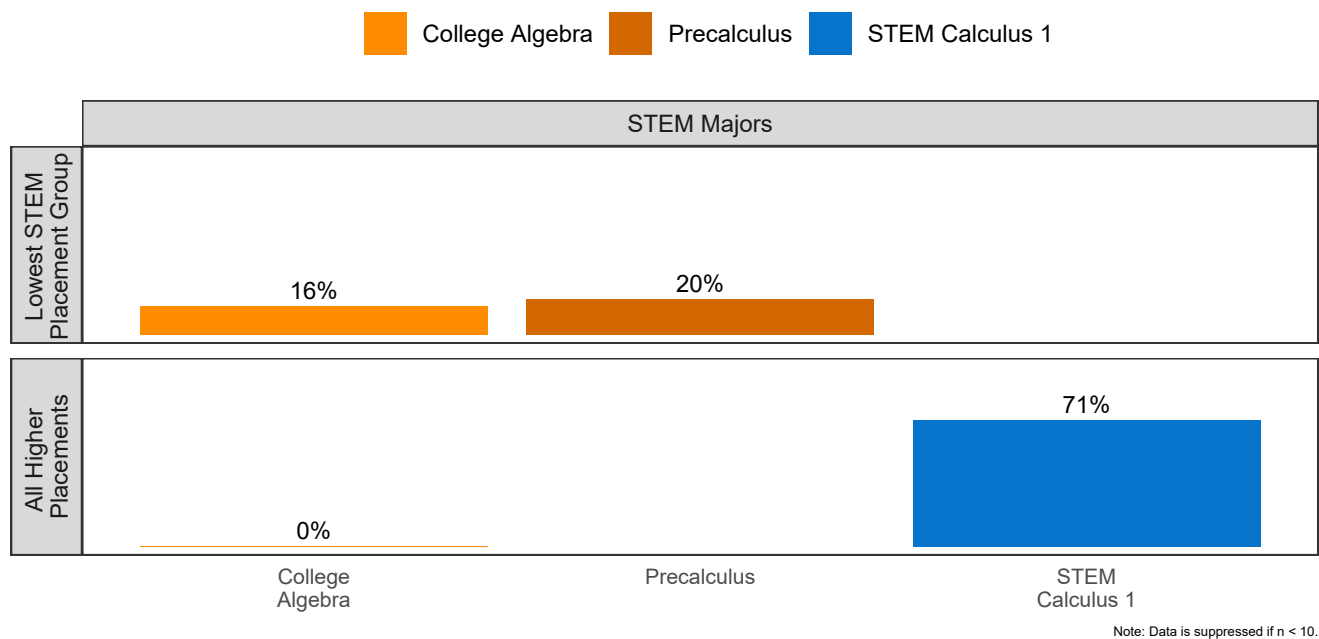

**Table 4. Three-Year STEM Calculus 2 Throughput by First CCC Calculus Pathway Course**

Only 2019-2020 and Fall 2020 cohorts were included for the Calculus 2 throughput analysis to allow for a full three-year observation window. Because it is not possible to identify students in the All Students group who are in programs that require Calculus 2, we include only STEM majors in this analysis and exclude Biology majors since the Biology Transfer Model Curriculum (TMC) only requires one semester of calculus.

	First CCC Math	STEM Majors	
		Cohort	3-Yr TR %
Lowest STEM Placement Group	College Algebra	19	16%
	Precalculus	15	20%
	STEM Calculus 1	*	*
All Higher Placements	College Algebra	12	0%
	Precalculus	*	*
	STEM Calculus 1	17	71%

\* Data is suppressed if n < 10.

**Figure 2. Three-Year STEM Calculus 2 Throughput by First CCC Calculus Pathway Course**

**Table 5. Courses Included Analysis by Math Typology Category**

The table below contains all Mt. San Jacinto College courses with enrollments during the time frame considered in this college-specific analysis.

CB00	Local Course ID	Course Title	Math Typology Category
CCC000187803	MATH105	College Algebra	College Algebra
CCC000598476	MATH110	Pre-Calculus	Precalculus
CCC000598479	MATH211	Analytic Geometry And Calculus I (Formerly Calculus I And Analytic G	STEM Calculus 1

## **Additional Methodology Notes**

The identification of STEM majors requiring STEM Calculus was based on C-ID Transfer Model Curricula (TMC). Biology is excluded from the STEM Calculus 2 pathway analysis because the TMC for biology does not include Calculus 2. The following TOP Codes were used to identify STEM majors: 1905.00, 0706.00, 0707.00, 0707.10, 0901.00, 1914.00, 1701.00, 1902.00, 0401.00, 4902.00.

Data for high school preparation was obtained from CCCApply self-reported high school information. Students with no high school data from CCCApply (missing both GPA and highest high school course passed or attempted) are excluded from the analysis since they could not be assigned to a placement group.

STEM Calculus 1 is defined as the first calculus course required for STEM majors and excludes business calculus and other forms of applied calculus.
