

# 2020-21 Five Year Capital Outlay Plan

California Community Colleges Chancellor's Office | Eloy Ortiz Oakley, Chancellor

#### **ELOY ORTIZ OAKLEY**

Chancellor

Aug. 21, 2019

The Honorable Gavin Newsom Governor of California State Capitol Sacramento, CA 95814

## RE: Report on California Community Colleges Five-Year Capital Outlay Plan for 2020-21

Dear Gov. Newsom:

The California Community Colleges Chancellor's Office and the Board of Governors are pleased to release the 2020-21 Five-Year Capital Outlay Plan for the California Community Colleges. The California Community Colleges has more than 2.1 million students enrolled in its 73 districts, 115 college campuses and 78 approved educational centers. The infrastructure used to facilitate its educational programs and administrative operations includes more than 25,000 acres of land, 5,956 buildings and 87 million gross square feet of space that includes 54 million assignable square feet of space.

To support community college districts grow and improve their educational facilities, the Facilities Planning Unit of the California Community Colleges Chancellor's Office annually reviews and approves local Five-Year Capital Outlay Plans as part of the Capital Outlay grant application process. The Facilities Planning Unit also works alongside the Board of Governors of the California Community Colleges to develop an annual systemwide Five-Year Capital Outlay Plan pursuant to California Regulation and Education Code. The Five-Year Capital Outlay Plan is presented to California Legislature in conjunction with the Governor's Budget, and it clarifies statewide needs and priorities of the California Community Colleges.

We believe that proper educational facilities play a vital role in supporting the goals and commitments outlined in the California Community Colleges Vision for Success (Vision for Success). The Vision for Success permeates all functional areas of our community colleges, as it requires a combination of strategies and the coordinated efforts of tens-of-thousands of individuals both inside and outside the California Community Colleges. The Vision for Success is best articulated by its seven core commitments:

- 1. Focus relentlessly on students' end goals.
- 2. Always design and decide with the student in mind.
- 3. Pair high expectations with high support.

#### **Chancellor's Office**

- 4. Foster the use of data, inquiry and evidence.
- 5. Take ownership of goals and performance.
- 6. Enable action and thoughtful innovation.
- 7. Lead the work of partnering across systems.

In the context of facilities planning and capital outlay, the core commitments of the Vision for Success inspires and informs our work to create learning facilities that enhance the opportunities for our students to successfully achieve educational goals. While this 2020-21 Five-Year Capital Outlay Plan offers important technical information about statewide community college facilities planning and priorities, it also demonstrates our intent to provide our students with the best possible facilities to foster their education.

Thank you for your interest and support in serving our students.

Sincerely,

Eloy Ortiz Oakley, Chancellor

### INTRODUCTION

The California Community Colleges forms the largest postsecondary educational system in the United States. The California Community Colleges serves 2.1 million students annually; this represents 20% of the nation's community college students and more than 70% of California's public postsecondary undergraduate students in both vocational and academic programs. The system consists of 73 community college districts encompassing 115 colleges, 78 approved off-campus centers and 24 separately reported district offices. California community college system assets include more than 25,000 acres of land, 5,956 buildings and more than 87 million gross square feet of space that includes more than 54 million assignable square feet of space. In addition, the system has many off-campus outreach centers at various locations.

### **BACKGROUND**

California Government Code (GOV) Section 13100-13102 require the governor to annually submit a five-year capital infrastructure plan to the Legislature in conjunction with the Governor's Budget. To accomplish this, every entity of state government is required to provide to the California Department of Finance (Department of Finance) information related to capital infrastructure needs and costs for a five-year period. Additionally, California Education Code (EDC) Section 67501 and 67503 require the California Community Colleges Chancellor's Office (Chancellor's Office) to prepare a five-year capital outlay plan identifying the statewide needs and priorities of the California Community Colleges.

### **SUMMARY OF RESULTS**

### **Total Facilities Needs and Costs**

The 2020-21 Five-Year Capital Outlay Plan (Five-Year Plan) for the California Community Colleges covers the period from 2020-21 through 2024-25, and its total is **\$22 billion** (see Table 1B). This amount includes **\$8.6 billion** for construction of new facilities for enrollment growth and **\$13.4 billion** for modernization of existing facilities.

In addition to capital facility needs, the California Community Colleges needs that are deferred to future years totals **\$7.2 billion** (see Table 1C). This amount includes **\$5.8 billion** of out-year costs for continuing phases of projects started within the Five-Year Plan period and **\$1.4 billion** of need are carried over into subsequent plan years, primarily for modernization projects. Please see Table 2A-2C to understand how these deferred facilities needs and costs are distributed.

Currently, the total unmet facilities needs for the California Community Colleges are approximately **\$29 billion** for the five-year period of this plan (see Table 1A). The total facilities needs for the next 10 years, including the \$29 billion of unmet capital facility needs identified in this Five-Year Plan, are approximately \$43.1 billion.

## TOTAL FACILITIES NEEDS AND COSTS (Table 1A - 1D)

## **Table 1A Unmet Facilities Needs**

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth	5,305,572	\$10,056,094,000
Modernization of Existing Facilities	29,129,457	\$19,296,666,000
Total Unmet Needs	34,435,029	\$29,352,760,000

## Table 1B Proposed Facilities in 5-Year Plan

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth	5,736,575	\$8,634,906,000
Modernization of Existing Facilities	25,030,910	\$13,428,311,00
Total Proposed Facilities	30,767,485	\$22,063,217,000

## **Table 1C Deferred Facilities Needs**

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth		\$1,421,188,000
Modernization of Existing Facilities	4,098,547	\$5,868,355,000
Total Deferred Needs	4,098,547	\$7,289,543,000

## **Table 1D Total Deferred Needs**

Category	Assignable Square Feet	Costs
Total Unmet Needs	- 34,435,029	- \$29,352,760,000
Total Proposed Facilities	30,767,485	\$22,063,217,000
Total Deferred Needs (1A-1B)	4,098,547	\$7,289,543,000

## DEFERRED FACILITIES NEEDS & COSTS (Table 2A - 2C)

## **Table 2A Continuing Phases of Projects Started in Plan**

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth	N/A	\$1,421,188,000
Modernization of Existing Facilities	N/A	\$3,474,820,000
Total Continuing Phases	N/A	\$4,896,007,000

## **Table 2B Need Carryover**

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth		\$
Modernization of Existing Facilities	4,098,547	\$2,393,536,000
Total Need Carryover	4,098,547	\$2,393,536,000

#### **Table 2C Total Deferred Needs**

Category	Assignable Square Feet	Costs
Total Continuing Phases	N/A	\$4,896,007,000
Total Need Carryover	4,098,547	\$2,393,536,000
Total Deferred Needs	4,098,547	\$7,289,543,000

### Areas of Understatement

The estimated **\$29 billion** of the California Community Colleges' systemwide total unmet facilities needs and costs is conservative. These cost estimates used to determine systemwide needs are potentially understated in the following ways (systemwide facilities needs and costs will be discussed in detail in the body of the report):

- The average includes the less expensive space types, while the facilities needed by the California Community Colleges are projected to include the more expensive space types (e.g., laboratory and library space).
- Site development costs are not included in the cost estimates because it is impossible to determine the average site cost per assignable square foot since site development costs vary substantially from project to project.
- For the statewide modernization projects, the Chancellor's Office assumes that buildings more than 25 years old will be modernized at 75% of the cost of a new building. Since many of California Community Colleges' buildings are more than 30 years old, it is likely that many of the buildings will need to be demolished and replaced at a significantly greater cost rather than if they were to be remodeled.

### CHARACTERISTICS OF THE FIVE-YEAR PLAN

This Five-Year Plan was developed to meet the requirements of GOV §§ 13100-13102 and EDC § 67500-67503. The California Community College Chancellor's Office evaluated individual projects with respect to the following:

- Funding priorities for the system per the Board of Governors of the California Community Colleges (Board of Governors) Priority Criteria.
- Capacity/load ratios (i.e., existing facility capacity to enrollment load) for the various space types at each campus.
- The district's ability to complete projects within the time frame of the plan successfully.

The first year of the plan, 2020-21, consists of 234 projects totaling \$1.8 billion. These projects include 64 state-funded projects at \$1.16 million, \$650 million in proposed state funding and \$507 million in local contributions (please see Appendices B.3 and C.8.2). The subsequent four years of the Five Year Plan will be scheduled based on facility needs and logistics, regardless of funding availability. Rather than relying on an approach that reflects available funding, scheduling accurately demonstrates the unmet facility needs of the California Community Colleges.

### **Plan Constraints**

The Chancellor's Office continues to refine the Five-Year Plan to quantify and articulate all the capital infrastructure needs of the community college system to the greatest extent possible, pursuant to GOV and EDC requirements. Additionally, districts have made progress in submitting individual Five-Year Plans that reflect actual unmet capital needs with more accuracy, and the plan reflects.

Despite this progress, the local Five-Year Plans do not completely represent the unmet capital needs of the California Community Colleges. The Chancellor's Office will continue to estimate a portion of the unmet needs throughout the system and, in consultation with the Association of Chief Business Officers Facilities Task Force, identify best practices and streamline existing processes in order to ensure high-quality district capital outlay planning.

## Methods to Support Districts with the Capital Outlay Process

In partnership with the Facilities Task Force and system stakeholders, the Chancellor's Office has implemented the methods listed below to support districts with the capital outlay process:

#### **FUSION**

The Facility Utilization Space Inventory Options Net (FUSION) and the latest step in its evolution, FUSION2, is a web-based project planning and management tool. The districts initiated the development of this system to assist with facilities planning efforts. The core of the data system is the Facilities Condition Assessment, which evaluates all buildings in the system. This assessment provides a wealth of data regarding the modernization needs.

Districts are also able to use other components of this tool for project planning, project management and administration. Additionally, FUSION supports other activities that will assist in identifying needed facilities and bringing those facilities on-line in an efficient manner.

## **Ready Access**

The Ready Access program is a development method initiated by the Chancellor's Office to streamline the capital outlay process, thereby bringing facilities on-line faster and at a lower cost. The Ready Access program provides lump sum state funding for all project phases in one Budget Act appropriation. The goal of Ready Access is to save state bond dollars, with no cost to the California General Fund, while also allowing local community college districts to complete their projects faster to address growth and modernization facility needs. The program saves the state money because a local contribution to offset state supportable costs is required for districts to participate in the program and by shortening the period to complete projects by at least one year. There is no change to the administrative and legislative oversight of capital outlay projects under the Ready Access program.

## **Design-Build**

In an effort to reduce costs and expedite capital projects, California Community Colleges received approval to take advantage of the Design-Build project delivery system. Design-Build allows a district to enter into a single contract with a design-build entity for design and construction of a building. Senate Bill 614, enacted in 2007, gave all community college districts the option to enter into design-build contracts for state and/or locally funded projects exceeding \$2.5 million. Senate Bill 1509, enacted in 2012, extended the authority of community college districts to use the design-build delivery system to January 1, 2020.

### ADMINISTRATION OF THE STATEWIDE CAPITAL OUTLAY PROGRAM

## **Review and Approval of District Projects**

## **Project Submittal Process**

To apply for state capital outlay funds, community college districts annually submit project proposals to the Chancellor's Office in two parts. The first part, an Initial Project Proposal, is a three-page concept paper used by the Chancellor's Office for systemwide need analysis and prioritization. This step in the screening process allows the Chancellor's Office to assess accurately the district's capital outlay needs on a systemwide priority basis before there is a significant investment of time and money in projects by the districts. Annually, districts submit project proposals to the Chancellor's Office for review by July 1 using the three-page Initial Project Proposal form. After evaluating the proposals, the Chancellor's Office notifies the districts of those proposals that will become Final Project Proposals, which are due the following year for possible submission to the Board of Governors for project scope approval.

The second part of the capital outlay process, the Final Project Proposal, is a fully-developed project proposal that is to be considered for inclusion in the Governor's Budget. The Final Project Proposal provides justification for the project and budget detail. Additionally, it describes the proposed project's relationship to the district's comprehensive education and facility master plans. Final Project Proposals include an analysis of viable alternatives to the proposed project.

## **Board of Governors Priority Criteria**

"Project scope approval" is defined as a project that meets the Board of Governors criteria for prioritizing capital outlay projects and may be eligible for funding pursuant to the requirements, standards, and guidelines outlined in the Education Code, *Title 5, California Code of Regulations, the Board of Governors of the California Community Colleges Policy on Utilization and Space Standards, the State Administrative Manual/Capitalized Assets, § 6800 et seq., and the Facilities Planning Manual.* 

Community college districts submitted fiscal year 2020-21 Final Project Proposals to the Chancellor's Office for funding consideration in July 2018. Chancellor's Office staff use the Board of Governors Capital Outlay Priority Criteria to rank capital outlay projects. Requests for Life and Safety (Category A) projects (A1) are of highest priority, followed by requests that address seismic deficiencies or potential seismic risk in existing buildings (A3), and infrastructure projects, or when failure or loss would otherwise result (A4). The Capital Outlay Priority Criteria provides that no more than 50% of state funds available for community college capital outlay projects be committed to address Life and Safety projects.

Once continuing phases of previously funded projects and new Life and Safety projects are prioritized, projects in the remaining categories are prioritized based on various factors using the priority criteria. The funding configuration for Growth (Category G) and Modernization (Category M) is as follows:

## **Board Of Governors Priority Criteria**

Category Code	Category	Funding Formula
G	Growth	35% of remaining funds after funding Category A projects.
М	Modernization	65% of remaining funds after funding Category A projects.

Based on the Chancellor's Office review of the Final Project Proposals, the eligible "new start" (versus continuing) projects are prioritized and presented to the Board of Governors annually for review and approval of project scope.

## **Funding Approval Process**

The Chancellor's Office develops and submits an annual Capital Outlay Spending Plan to the Department of Finance to be considered for funding in the next budget cycle, with a prioritized list of scope-approved projects previously discussed. Chancellor's Office staff use eligibility points to rank projects (highest to lowest) to place into Growth and Modernization Categories.

The Capital Outlay Spending Plan traditionally includes a maximum of one project from the Growth or Modernization Categories per authorized site per year, with the exception of Life and Safety projects that address health and safety, seismic or infrastructure failure problems. However, to provide as many districts as possible the opportunity to compete for state bond funds, current policy allows one project from the Growth or Modernization Categories per site for a two-year period. If more than one project is eligible for potential funding from the Growth or Modernization Categories per authorized site, the project with the highest local ranking from the district's five-year capital outlay plan is proposed for state funding. Life and Safety projects are the highest priority, so they are not subject to the two-year rule established for the other categories.

Annual funding of these projects is contingent upon their ability to meet the governor's priorities and the availability of funds to meet continuing needs. The Administration and Legislative Budget Committees scrutinize all capital construction projects to determine if projects meet current priorities (i.e., seismic, life-safety, vital infrastructure, major code deficiencies and increased instructional access).

The Chancellor's Office developed the annual Capital Outlay Spending Plan using a "zero-based" budgeting method in which all proposals eligible to compete in a specific fiscal year are evaluated to determine that the highest priority projects are included in the spending plan based on the funds available. Final Project Proposals not included in a specific year's spending plan must compete in a subsequent budget cycle. Between budget cycles, districts may update or modify the proposals as needed to reflect changing local needs or priorities. Final Project Proposals that are submitted for state funding but do not receive appropriations in a Budget Act have no special standing in subsequent budget cycles.

## OTHER BOARD OF GOVERNORS AND CHANCELLOR'S OFFICE CAPITAL OUTLAY RESPONSIBILITIES

## **Future Capital Outlay Needs**

The Chancellor's Office has done an analysis of the total facilities needs for the California Community Colleges over the next 10 years (2020-21 through 2029-2030; see **Appendix G**). For the next ten years, the total facilities need, including the **\$29 billion** of unmet capital facility needs identified in this Five-Year Plan, are estimated at approximately **\$43.1 billion**. For the purposes of this plan, the Chancellor's Office conservatively estimates that \$25 billion of local bond funds remain uncommitted to fund state supportable projects. Current and future local bond funds from the Smaller Classes, Safer Schools, and Financial Accountability Act will fund more than 40% of state-supportable facilities and 100% of non-state supportable facilities such as parking lots/garages, stadiums, cafeterias, bookstores and health centers.

The need for facilities to be funded by future state general obligation bonds, after adjusting for the estimated \$24.6 billion of local bond funds that remain uncommitted and the \$369 million from the 2016 state general obligation bond, is **\$18.1 billion**. This amount equates to a need for **\$3.6 billion** of state general obligation bond funding every two years. Given this great need, the state must continue to work closely with the districts to allocate scarce resources to address adequately the needs of California's community college students.

## **Statewide General Obligation Bonds**

Previous state general obligation bond funds for community colleges – \$745.8 million in Proposition 47 (2002), \$920 million in Proposition 55 (2004), and \$1.5 billion in Proposition 1D (2006) – either were spent or committed to projects. The most recent Proposition 51 (2016) provides \$2 billion of state bonds for funding community college projects.

## The Smaller Classes, Safer Schools, and Financial Accountability Act (Proposition 39, 2006) – Local Funds

The funding for community college facilities is a responsibility shared by the state and local community college districts. The primary source of financing for the local share of construction costs is voter-approved local bonds. From June 1998 through November 2000, when bond measures required two-thirds voter approval, only 10 community college districts passed local bonds, providing only \$875.5 million for community college facilities. Since passage of the Smaller Classes, Safer Schools, and Financial Accountability Act (Proposition 39, 2012) in 2000, voters have approved 129 of 151 (85%) local bond measures – including the passage of 2016 and 2018 local bond measures that provides \$14.3 billion for 25 districts – authorizing \$42.8 billion in bonds for 70 of 73 community college districts.

## **Voluntary Local Contributions**

The Board of Governors adopted criteria for prioritizing capital outlay projects that emphasizes a "least cost to the state" policy. This policy stretches scarce state resources to help meet enrollment growth and modernization needs by providing an incentive for districts to contribute local dollars to projects.

In the 2020-21 Capital Outlay Plan, 61 of 64 (95%) projects proposed (please see Appendix B.3 for the draft 2020-21 spending plan) for 2020-21 provide for a local contribution. The total cost for supporting the 39 continuing and 25 new start projects for 2020-21 equal \$1.78 billion, with \$650 million in proposed state funding and \$507 million in local contributions. This amount reflects a local "system" contribution of approximately 44%. Local contributions will provide another \$258 million in 2021-22 to complete these projects. Additionally, districts construct a considerable number of capital projects using only local funding. Districts fund an additional \$1.8 billion of projects locally in 2020-21 (please see Appendix B.3 for more details).

California community college districts must use local bonds to fund non-state supportable but educationally essential capital outlay such as land acquisition, parking, cafeterias, bookstores and health centers. Land acquisition is particularly significant because the land costs can be equal to or greater than the cost of the buildings depending on the area where the district is located.

Additionally, the California Community Colleges do not augment project costs once these costs are approved in the Budget Act. Therefore, districts pay for cost overruns at bid award. Since this happens later in the process, this plan cannot capture these additional local contributions.

### **IDENTIFY DRIVERS OF NEED**

### FACTORS IMPACTING ENROLLMENT DEMAND

Enrollment at California community colleges peaked in 2008-09 with 2.7 million students. In a normal economic environment, the enrollment level would have been on an upward trend, as more students sought enrollment in a community college campus. However, due to the state's budget deficit from declining tax revenues, California Community Colleges faced a \$1.5 billion budget reduction, resulting in a 25% reduction of course offerings and a 22% drop in enrollment. Student enrollment decreased from 2.7 million students in 2008-09 to 2.1 million students in 2013-14.

In November 2012, California voters passed Proposition 30, the Schools and Local Public Safety Protection Act of 2012, which provides additional tax revenue to California's education budget through fiscal year 2018-19. In addition, in November 2016, California voters passed Proposition 55, which extended the collection of personal income tax revenue, without a sales tax component, to California's education budget through 2030. The increased funding from Propositions 30 and 55 helps California Community Colleges maintain access to students and be better positioned to meet the increasing demand for college-educated workers.

This systemwide California Community Colleges 2020-21 Five-Year Capital Outlay plan identifies a current need for approximately 6 million additional assignable square feet before taking into consideration additional enrollment growth forecasted in the plan. This translates to new classrooms and laboratories currently not available to offer course sections in green technology, workforce development, and other vital educational programs. Additionally, they are not available to provide transfer courses that students need to continue their education at public universities.

The capital outlay needs of the community college system are so great that any temporary downturn in enrollment will only delay, rather than decrease, the system's need for capital facilities. Historical trends indicate that California Community Colleges enrollment will continue to increase, and there is a current need for new and modernized facilities.

Additionally, the EDC provides that students have "free flow" access to all community college sites. Therefore, students are not restricted to any specific geographic area and can attend college at any campus in the state. While the overall system may appear to have excess facilities capacity, many individual campuses within the system have severe facility shortages. Therefore, the capacity needs for the system are estimated on a campus-by-campus basis.

### **ENROLLMENT PROJECTIONS**

California community colleges annually serve 2.1 million students — more than 70% of California's public undergraduate college enrollment — in both vocational and academic programs. This number is the *Actual Unduplicated Enrollment* rate for the system, and it represents the total number of students served in every term of the academic year. The number is denoted as "unduplicated" because a student enrolled in fall and spring semester would count as one student.

The estimated fall enrollment of 1.7 million students in 2020-21 guides this Five-Year Capital Outlay Plan. The Chancellor's Office expects enrollment to grow to an estimated 1.7

million students in 2024-25, an increase of approximately 86,000 students (see Appendix E). The Chancellor's Office calculates enrollment projections and provides them to districts for utilization in the districts' five-year capital outlay plans.

### **ENROLLMENT PROJECTION MODEL**

The Research and Planning Group (RP Group) and Chancellor's Office developed the current enrollment project methodology first implemented during the 2015-16 Five-Year Capital Outlay Plan. The model forecasts enrollment for each district based on a combination of variables including student participation rates, "in district" and "out of district" enrollment, weekly student contact hours to enrollment ratios, and adult population projections based on Geographic Information Systems zip code data. As a result, the model demonstrates less volatility and is a more accurate planning tool for community college facilities.

Table 3 below shows a projection of approximately 5.21% growth in enrollment and a 7.87% increase in weekly student enrollment contact hours (WSCH) over the Five-Year Plan period. WSCH rates are the product of the number of students and the scheduled class periods in which they are enrolled, in graded and ungraded community college classes convened prior to 10 o'clock pm during a census week. A class period is not less than 50 minutes and not more than 60 minutes (Cf. California Code of Regulation, Title 5, §57001(e)). Please see appendix E.1 for both multi-year enrollment and WSCH projection data.

Table 3 — Summary Of Enrollment And Weekly Student Contact Hours (WSCH)

Category	2020-21	2024-25	Difference	% Difference
Enrollment	1,656,325	1,742,666	86,341	5.21%
WSCH	17,226,713	18,583,000	1,356,287	7.87%

## TRANSLATING ENROLLMENT NEED INTO CAPITAL OUTLAY FACILITIES REQUIREMENTS

Table 4 shows the need to accommodate the enrollment projected over the next five years. The assignable square footage needs for these space types have been determined based on the enrollment projections, which utilize the formulas provided in the *California Community Colleges Board of Governors Space Utilization Standards* (space standards).

Table 4 — Gross Enrollment Needs

Space Category	Assignable Square Feet
Lecture	5,394,257
Lab	11,648,436
Office	6,994,540
Library	5,015,450
AV/TV	1,393,548
Other	20,824,415
Total	51,270,645

## "Other" Space

The total enrollment need of the 51.3 million assignable square footage includes 20.8 million assignable square footage of "other" space. The *space standards* lay out the parameters for calculating needed lecture, laboratory, office, library and AV/TV space categories based on a comparison of inventory and enrollment at a campus. In addition to the instructional space specified in the *space standards*, this Five-Year Plan also must account for the "other" space category that comprises the whole of the physical inventory for each campus.

The "other" space category consists of both instructional (e.g., physical education, performing arts and child development) and non-instructional support spaces that are essential to fulfilling the educational mission at each campus. However, there are no formulas specified in the *space standards* to define the "other" space category by comparing inventory capacity with projected enrollment. Since the "other" space category is essential to support the various space categories, it must be added to campuses as space increases.

To that end, this Five-Year Plan looks at two different factors to identify the need for "other" space at each campus: campus and system ratios. The first model assesses the physical inventory for each campus to calculate "other" space as a percentage of total space; this is the campus ratio. The physical inventory identifies each campus in the community college system as one of four types: college campus, center, district office or campus with district office. The campus ratio determines how much of the existing inventory is identified as "other" space in relation to total space for each campus.

The second factor of the model assesses the average ratio of "other" space to total space for each of these campus types; this is the systemwide ratio. The systemwide ratio determines, on average, how much of the existing inventory is identified as "other" space in relation to total space for each campus type.

Finally, the model compares the campus and systemwide ratios and bases the estimate of need for "other" space at each campus on the higher of the two ratios. This approach is conservative because the need could be understated if the campus has not yet constructed some of the facilities that are comprised of a majority of "other" space.

With the system ratio, the need for "other" space is based on the average of "other" space for that campus type. This ratio is used to estimate the need for other space for 60% of the campuses in the system. The ratios for some campuses are higher and some are lower, and the need for "other" space is essentially being capped by this ratio for more than half the campuses in the system. In the long term, this approach understates the need for "other" facilities.

## INVENTORY AMOUNT AND TYPE OF EXISTING SPACE & INFRASTRUCTURE

### **CURRENT CAPACITY**

The California Community Colleges infrastructure consists of the following: 73 districts, 115 community colleges, 78 approved off-campus centers, 24 separately reported district offices, and many non-state-funded off-campus outreach centers. In addition, California Community Colleges assets include: 25,299 acres of land, 5,956 buildings, and 87 million gross square feet of space. These buildings provide the following assignable square feet in the various Board of Governors space categories as shown in Table 5 below:

**Table 5 — Net Capacity** 

Space Category	Current Total Assignable Square Feet	Less Excess Capacity	Net Capacity
Lecture	7,997,407	-3,008,264	4,989,143
Laboratory	13,344,146	-3,194,613	10,149,533
Office	8,233,223	-1,994,855	6,238,368
Library	4,516,196	-292,856	4,223,340
AV/TV	632,334	-52,025	580,309
Other	20,158,267	-2,808,852	17,349,415
Total	54,881,573	-11,351,465	43,530,108

The current capacity of 54.9 million assignable square feet, detailed in Table 5, is based on the systemwide 2017-18 space inventory reported by the districts. The system's 52 million assignable square feet are adjusted to include projects currently in the pipeline, which includes approximately 2.9 million assignable square feet.

#### **EXCESS CAPACITY**

Some campuses within the system have excess capacity in various space categories. While the overall system may appear to have excess facilities capacity, many individual campuses within the system have severe capital facility shortages. Therefore, the capacity needs for the system are estimated on a campus-by-campus basis. Facilities capacity exceeding 100% at individual campuses, which is currently approximately **11.3 million assignable square feet** (see Table 5, column 2), were eliminated for the purpose of estimating the need for additional facilities. Using this approach, excess capacity will not artificially decrease the true facilities needs on other campuses.

Previous reports have defined the excess space capacity of the California Community Colleges as having a "mismatch" problem. Examples of this "mismatch" are improper size classrooms on a particular campus that do not fit courses planned to be offered in them, antiquated designs that cannot accommodate modern media presentations, insufficient Americans with Disabilities Act required access, or improper wiring for computers or multi-media equipment.

Excess capacity currently consists of approximately 21% of the total system capacity. The excess capacity level grows to 21% over the five-year period of the plan (see Appendix C.5). It should be noted, however, that the excess capacity rates in the 2020-21 Five-Year Capital Outlay Plan may be overstated because the State of California funded 59 capital outlay projects in 2019-20, which added more space to this plan. The total net capacity for the system is therefore approximately **44 million** (see Table 5, column 3).

### MODERNIZATION OF EXISTING FACILITIES

## **Systemwide Facilities Needs**

The five-year construction plans submitted by districts do not fully reflect their total facility needs. This systemwide plan five-year includes specific projects detailed in the district's individual five-year capital outlay plans over the same period. However, since there are still systemwide needs that are not reflected in the districts' individual five-year capital outlay plans, the Chancellor's Office has estimated some of these systemwide needs on a statewide-basis.

The systemwide facilities needs estimated in this section do not add or remove capacity from the system. However, these systemwide needs are in addition to the projects that were submitted in the districts' Five-Year Plans, and they must be included in this analysis to provide a more accurate picture of the California Community Colleges' systemwide facility needs. Specifically, the Chancellor's Office has estimated the systemwide need for modernization of existing facilities, including Life and Safety renovations, modernization/renovation and replacement of temporary facilities projects.

Table 6 outlines the rules for estimating these needs. Years one through five of the plan include actual projects submitted by districts in the individual district five-year capital outlay plans for these project types, including both state and locally funded projects. Systemwide facilities needs are estimated only after the space impacts of all projects submitted by the districts have been taken into consideration.

Table 6 - Systemwide Facilities Needs Methodology

Text No.	Driver	Objective	Basis for Determining Need	Projects (CCCI 6684; EPI 3607)
I	Life and Safety Renovations. <sup>1</sup> (includes fire/life safety, seismic and infrastructure)	To maintain ongoing funding based on history.	Average statewide spending for the first two years of the 5YP for critical projects.	20-21 through 24-25 Projects identified by the districts with costs.  20-21 through 24-25
			Assignable square feet is not applicable.	One systemwide need project per year (\$475 million in unplanned costs)
II	Modernization/ Renovation	To modernize all permanent buildings more	Assignable square feet for buildings in bad condition plus	20-21 through 24-25 Projects identified by the districts with costs.
		than 25 years old.	assignable square feet for buildings more than 25 years old; projects address buildings	20-21 through 24-25 One systemwide need project per year; projects to start in each year.
			more than 40 years old.	Cost Formula = ASF x \$596 \$596 = (preliminary plans/ working drawings=\$69, construction=\$527)
III	Replacement of Temporary Buildings	To minimize the use of temporary buildings.	ASF for temporary buildings more than 10 years old.	22-23 through 24-25 One systemwide need project per year.
				Cost formula = ASF x \$863 \$863 = (preliminary plans/ working drawings =\$91, construction=\$702, Demolition=\$70)
IV	Enrollment (discussed in next section)	To address 100 % of the enrollment need at all sites,	Enrollment projections converted to	20-21 through 24-25 Projects identified by the districts with costs.
	excluding needs met through alternative space standards adopted by Board		22-23 through 24-25 One systemwide need project per year.	
			of Governors.	Cost Formula = ASF x \$850 \$850 = (preliminary plans/ working drawings =\$91, construction=\$702, equipment=\$57)

<sup>&</sup>lt;sup>1</sup>Please see the Board of Governors priority criteria and funding approval process for information concerning how the Life and Safety projects are reviewed; it can be found in the "Introduction "section, under the heading "Administration of the Statewide Capital Outlay Program" section of Five-Year Plan. To understand the need for Life and Safety projects in the 2020-21 Five-Year Plan, please see the "Unmet Facilities Need" section of the Five-Year Plan.

### **Cost Estimates**

The costs for the additional systemwide needs were estimated based on the California Community Colleges building cost guidelines at California Construction Cost Index (CCCI) 6684. The cost estimates include an allowance for preliminary plans, working drawings and construction. Cost estimates for the replacement of relocatable facilities with permanent facilities include an additional allowance for demolition.

The cost estimates do not include an allowance for site development costs because it is impossible to estimate the average site cost per assignable square foot. After all, site development costs vary substantially from project-to-project. Cost estimates for the statewide needs are therefore substantially underestimated.

Based on the assumptions provided in Table 6, this Five-Year Plan defines total systemwide modernization needs of **29.1 million assignable square (ASF) feet** at a cost of **\$19.7 billion**. This includes approximately **\$832 million** for Life and Safety renovations, **\$17.4 billion** for the modernization/renovation of permanent facilities and **\$1.5 billion** for the replacement of temporary buildings.

**Table 7 — Modernization Of Existing Facilities** 

Modernization of Existing Facilities	Estimated Need ASF	Estimated Need Costs	Five-Year Plan Proposal ASF	Five-Year Plan Proposal Costs	Deferred Facilities Needs Out year	Deferred Facilities Needs Carryover
Critical Life Safety Renovation	N/A	\$831,910,000²	N/A	\$356,910,000³	\$	\$
Modernization/ Renovation	27,306,261	\$17,439,266,000	23,479,822	\$12,137,335,000	\$3,132,339,000	\$2,169,591,000
Replace Temporary Buildings	1,823,196	\$1,500,490,000	1,551,088	\$934,065,000	\$342,480,000	\$223,945,000
Total	29,129,457	\$19,771,666,000	25,030,910	\$13,428,311,000	\$3,474,820,000	\$2,393,536,000

<sup>&</sup>lt;sup>2</sup>The \$832 million estimated need costs reflect both \$356 million in projects submitted by California community college districts over the course of the Five-Year Plan and \$475 million in projected costs for unplanned Life and Safety projects within this five-year planning period.

Because of the magnitude of the system's modernization needs, the proposal in this Five-Year Plan includes only a portion of the modernization needs of the system. This Five-Year Plan calls for the modernization of only **25 million assignable square feet** over the next five years at a cost of **\$13.4 billion**. This amount includes the cost of:

- Life and Safety renovations
- The modernization/renovation of only those permanent buildings more than 40 years old and buildings reported by districts as being in need of major renovation
- The replacement of temporary buildings more than 10 years old

<sup>&</sup>lt;sup>3</sup>Cf. footnote 2.

This would result in the renovation of the oldest buildings and those in the poorest condition first. The out-year cost of approximately **\$3.5 billion** reflects modernization/renovation projects started in the plan year. The carryover cost of approximately **\$2.4 billion** represents modernization/renovation of 4.1 million assignable square feet of buildings more than 25-years but less than 40-years old and temporary buildings less than 10-years old deferred beyond the plan time frame.

## Life and Safety Renovations — I

Life and Safety means that a building poses imminent danger to the life or safety of the building occupants, has a potential seismic risk or has potential for immediate infrastructure failure. Because of the risk associated with Life and Safety issues, many of the projects are funded at the local level. If projects are submitted for state funding and the Chancellor's Office finds that they require state money to mitigate the Life and Safety issues, those projects are funded as soon as possible. Therefore, district five-year capital outlay plans typically would not contain unfunded Life and Safety projects.

For the purposes of this submittal, the Chancellor's Office has an estimated need of \$831 million, which both reflects \$357 million from projects by districts during this Five-Year Planning period and the estimated annual costs for Life and Safety projects not yet identified on a statewide basis. Since these projects are not always planned, \$475 million has been projected for unknown Life and Safety projects. The scope of these projects is constrained to only those renovations that mitigate the Life and Safety aspects of the facilities, and any building code upgrades required by the California Department of General Services' Division of the State Architect. Projects that completely modernize existing facilities are estimated below in the Modernization/Renovation category.

## Modernization/Renovation — II

More than 62% of California Community Colleges permanent facilities are 25 years or older and more than 49% are more than 40 years old, and in dire need of renovation and/or modernization (see Exhibit 8A). Districts have tried to maintain their structures to every extent possible by using limited local and/or state resources.

Additionally, due to technological advances, California Community Colleges needs to incorporate more sophisticated technology into its facilities so the system can deliver state-of-the-art instructional programs. To make buildings "smarter" by providing cabling and deliverance systems to the instructional space, major renovations will be required.

2,500,000

ASF Over 25 Years
2,710 Buildings
62% of Inventory

ASF Over 40 Years
2,188 Buildings
49% of Inventory

500,000

ASF Over 40 Years
2,188 Buildings
49% of Inventory

Year

**Exhibit 8A - Permenant ASF by Year of Construction** 

Due to the magnitude of the system's modernization/renovation needs, the proposal in this Five-Year Plan includes only a portion of the modernization/renovation needs of the system. As shown in Table 7, the Five-Year Plan includes **23.5 million assignable square feet** to be modernized over the next five years at a cost of **\$12.1 billion** and includes only those buildings more than 40 years old and buildings reported by districts as being in need of major renovation. The cost estimate for modernization/renovation needs is based on 75% of the cost of a new building, excluding equipment (\$596 per assignable square feet).

## Replace Temporary Facilities — III

The California Community Colleges inventory includes temporary facilities that are operating far-beyond their useful life. It is the policy of the Board of Governors that the districts provide permanent structures rather than relocatable buildings to meet student access requirements. Temporary facilities are not as effective for providing certain instructional programs, and are more costly to operate and maintain than permanent structures.

Exhibit 8B shows that many of the "temporary" structures on community college campuses were replaced 10 or more years ago. Based on the assumptions provided in Table 6, the Chancellor's Office estimates the statewide cost for replacing temporary facilities with permanent facilities at \$934 million over the next five years, leaving \$342 million in out-year costs. This cost assumes that the total 1.6 million assignable square footage of temporary inventory over 10 years of age will be replaced over the next five years at the average new building cost (\$863 per assignable square feet), with an added allowance for demolition.

**Exhibit 8B - Temporary ASF by Year of Construction** 

### **UNMET FACILITIES NEEDS**

### **NET ENROLLMENT NEED**

Table 9 below shows that the California Community Colleges will need approximately **7.7 million assignable square feet** to accommodate projected enrollment over the next five years. This estimate is based on the assignable square feet (ASF) needed to accommodate projected enrollment growth, less than the net capacity currently available to meet that enrollment demand.

Table 9 — Net Enrollment Need

Space Category	Total ASF Needed: Current Deficiency	Future Enrollment Growth	Total ASF Needed: Total
Lecture	69,682	335,431	405,113
Laboratory	910,342	588,561	1,498,903
Office	527,312	228,860	756,172
Library	742,305	49,805	792,110
AV/TV	826,216	(12,977)	813,239
Other	2,745,741	729,259	3,475,000
Total	5,821,598	1,918,939	7,740,537

### ALTERNATIVE MEANS OF DELIVERY AND YEAR-ROUND OPERATION

A portion of the capital facilities needs identified above can be offset by the use of alternative means of educational delivery. These alternative means of delivery involve modifying various components of the educational delivery process including scheduling, space utilization and alternative instruction.

## Scheduling/Space Utilization — I

The California Community Colleges is the most aggressive California public postsecondary segment in the use of alternative scheduling and has been very successful in maximizing the use of existing facilities year-round. The average number of days of instruction for the colleges has increased from 271 days per year in 1996-97 to 294 days for the 2017-18 fiscal year (Chancellor's Office Management Information Systems report).

Community colleges schedule classes from the early morning through late evening as well as on weekends to provide the required student access. The system also continues to expand course offerings by utilizing off-campus facilities such as leased storefronts, businesses, high schools and other joint-use facilities. Districts continue to provide space for the University of California and California State University systems, and other private post-secondary institutions on numerous campuses and sites.

## **Year-Round Operations**

For evaluating facility usage, a "term factor" of 1.67 must be used in order to make summer and winter term full-time equivalent students (FTES) comparable to fall and spring FTES due to the shortened length of those terms. For 2017-18, this results in a summer term FTES that is 39.8% of the average fall/spring term FTES and winter term FTES that is 11.7% of average fall/spring term FTES (see Appendix H.1).

### Alternative Methods of Instruction — II

Alternative methods of instruction such as distance learning are also an important component in providing increased student access for the California Community Colleges. Many districts are actively pursuing online courses as a method of instruction in order to provide greater access for students as well as reducing the need for new facilities.

In 2017-18, distance education full-time equivalent students (164,855) accounted for 16% of total full-time equivalent students (1,182,621) compared to 14 % in 2016-17. The Chancellor's Office is committed to utilizing state resources to the fullest extent possible and has assumed in this analysis that campuses with enrollment deficiencies will meet 10% of their total enrollment needs (**-1,139,359 assignable square feet**) through alternative means of delivery as shown in Table 10. The 10% is a number from the Long-Range Master Plan for the California Community Colleges and is intended to provide incentive to districts to think first of alternative means of instruction to solve facilities shortages rather than new facilities.

Table 10 — Unmet Enrollment Need

Space Category	ASF to Meet Enrollment Need	Excess Capacity Used to Offset Enrollment Need	Less Alternative Means of Delivery	Unmet Enrollment Need
Lecture	405,113	-191,576	-72,356	141,181
Laboratory	1,498,903	121,703	-452,010	1,168,597
Office	756,172	35,790	-280,920	511,042
Library	792,110	130,010	-303,011	619,109
AV/TV	813,239	20,032	-121,676	711,594
Other	3,475,000	249,410	-1,139,359	2,585,052
Total	7,740,537	365,369	-2,369,332	5,736,575

### NEW FACILITIES FOR ENROLLMENT GROWTH

Therefore, **5,305,572** assignable square feet is needed at a cost of **\$10** billion to accommodate current and future enrollment as shown in Table 11. This includes individual growth projects, both state and locally funded, submitted by districts for all five years of the plan and identified systemwide facilities needs for each campus for the final three years of the plan. The systemwide facilities needs are estimated only after the space impacts of all projects submitted by the districts have been taken into consideration.

In the previous section, Table 6 summarized the rules for estimating the costs of these new facilities. An average building cost of \$850 per assignable square feet was utilized based on the California Community Colleges building cost guidelines at California Construction Cost Index 6684 and Equipment Price Index 3607. This amount represents the average building cost for all space types and includes an allowance for preliminary plans, working drawings and equipment (Preliminary Plans/ Working Drawings = \$91, Construction = \$702, and Equipment = \$57 per assignable square feet).

Table 11 — Total Unmet Needs And Costs

UNMET NEEDS	ASF	COSTS
New Facilities for Enrollment Growth	5,305,572	\$10,056,094,000
Modernization of Existing Facilities	29,129,457	\$19,296,666,000
Total	34,435,029	\$29,352,760,000

### TOTAL UNMET NEEDS AND COSTS

Table 11 shows that the total unmet facilities needs for the system are **\$29.3 billion**. Unmet need consists of two components: 1) new facilities needed to accommodate current and future enrollment growth and 2) modernization of existing buildings.

## **FACILITIES TO MEET UNMET NEED**

### **FACILITIES PROPOSED IN FIVE-YEAR PLAN**

### **New Facilities for Enrollment Growth**

This Five-Year Plan includes **\$8.6 billion** for new facilities to accommodate existing and future enrollment as shown in Table 12B. This amount includes individual projects, both state and locally funded, submitted by districts for all five years of the plan and identified systemwide facilities needs for each campus for the final three years of the plan.

### Tables 12A - 12C — Total Facilities Needs & Costs

#### **Table 12A — Unmet Facilities Needs**

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth	5,305,572	\$10,056,094,000
Modernization of Existing Facilities	29,129,457	\$19,296,666,000
Total Unmet Needs	34,435,029	\$29,352,760,000

## Table 12B — Proposed Facilities in 5-Year Plan

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth	5,736,575	\$8,634,906,000
Modernization of Existing Facilities	25,030,910	\$13,428,311,000
Total Proposed Facilities	30,767,485	\$22,063,217,000

### Table 12C — Deferred Facilities Needs

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth		\$1,421,188,000
Modernization of Existing Facilities	4,098,547	\$5,868,355,000
Total Deferred Needs (12A-12B)	4,098,547	\$7,289,543,000

### Modernization

The modernization needs of **\$13.4 billion** in the plan were estimated based on the assumptions discussed in the previous section. As with enrollment projects, this amount includes individual projects, both state- and locally-funded, submitted by the districts for all five years of the plan and identified systemwide facilities needs for each campus for the final three years of the plan.

### **DEFERRED COSTS OF SYSTEM NEEDS**

The deferred costs of systemwide needs include out-year costs for continuing projects and need carryover to future plan years as shown in Table 13A - 13C.

## **Out-year Costs**

The out-year costs to complete continuing phases of projects started but not assumed to be fully funded within the Five-Year Plan period are estimated to be **\$4.9 billion**. This amount includes approximately **\$1.4 billion** for new facilities and **\$3.5 billion** for modernization of existing facilities.

## **Need Carryover**

Additional facilities need, including **4.1 million assignable square feet** at a cost of approximately **\$2.4 billion**, have been deferred beyond the period of this Five-Year Plan because the need in this area is too substantial to be accomplished in that time frame. There may also be carryover of new project costs from year-to-year within the Five-Year Plan period in order to accommodate project budgets and scheduling.

Table 13A - 13C — Deferred Facilities Needs And Costs
Table 13A — Continuing Phases of Projects Started in Plan

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth	N/A	\$1,421,188,000
Modernization of Existing Facilities	N/A	\$3,474,820,000
Total Continuing Phases		\$4,896,007,000

## Table 13B — Need Carryover

Category	Assignable Square Feet	Costs
New Facilities for Enrollment Growth		\$
Modernization of Existing Facilities	4,098,547	\$2,393,536,000
Total Need Carryover	4,098,547	\$2,393,536,000

### Table 13C — Deferred Facilities Needs And Costs

Category	Assignable Square Feet	Costs
Total Continuing Phases		\$4,896,007,000
Total Need Carryover	4,098,547	\$2,393,536,000
Total Deferred Needs (13A-13B)	4,098,547	\$7,289,543,000

### **SUMMARY**

This Five-Year Plan proposal contains only a portion (\$22 billion) of the estimated systemwide facility needs. An additional \$7.2 billion of currently identified facilities needs are deferred to future years as shown in Table 13C, with \$4.8 billion of out-year costs for continuing phases of projects started within the Five-Year Plan period and approximately \$2.4 billion of need carryover into subsequent plan years; these costs are primarily for modernization/renovation projects. At this time, the total unmet facilities needs for the California Community Colleges are estimated at \$29.3 billion.

## **CONSEQUENCES OF NOT ADDRESSING IDENTIFIED NEEDS**

### **ENROLLMENT PRESSURES**

In order to assess accurately the needs presented in this report and the potential consequences of not providing the needed facilities, it is necessary to review the role of the California Community Colleges in terms of public postsecondary education. That requires a recap of five important points:

- The California Community Colleges is the largest system of higher education in the United States, and annually services 2.1 million students – 20% of the nation's community college students
- After enrollment peaked in 2008-09 with 2.7 million students, the system faced a budget reduction of \$1.5 billion, leading to a 22% drop in enrollment in 2013-14
- In November 2012, voters passed Proposition 30 (2012) and Proposition 55 (2016), which provides additional tax revenue to California's education budget through fiscal year 2018-30. That money is helping the California Community Colleges restore access to millions of students turned away during the Great Recession
- This systemwide California Community Colleges Five-Year Capital Outlay Plan identifies a current need for approximately 7 million additional assignable square feet before taking into consideration additional enrollment growth forecasted in the plan
- The capital outlay needs of the community college system are vast, and any temporary downturn in enrollment will only delay, rather than decrease, the system's need for capital facilities

### MISSION CRITICAL IMPACTS

The three critical components of the mission of the California Community Colleges include the *California Community College Vision for Success* (*Vision for Success*), the four-year institution transfer function and preparation of students for the workforce.

### **Vision for Success**

The California Community Colleges *Vision for Success* articulates a student-oriented mission to improve the educational system. High-quality educational environments play a vital role in supporting the goals and commitments outlined of this mission. The *Vision for Success* permeates all functional areas of California community colleges, as it requires a combination of strategies and the coordinated efforts of tens-of-thousands of individuals both inside and outside the California Community Colleges. This integrated and collaborative approach will enhance education quality and learning environments for students in the community college system.

### **Transfer Function**

The transfer function is a critical mission of the California Community Colleges, and the system has initiated a host of policies and programs to improve this function. The Student Transfer Achievement Reform Act (Senate Bill 1440 Padilla) has enabled the California Community Colleges and California State University to collaborate on the creation of Associate in

Arts (AA) and Associate in Science (AS) degree transfer programs that provide a statewide transfer pathway. The Student Success Act of 2012 (Senate Bill 1456 Lowenthal) will further help students reach their goal of obtaining a degree or transferring to a four-year institution by providing effective key student services for increasing access and success such as orientation, assessment and placement, and counseling. California Community Colleges transfer students account for 48 % of the University of California's bachelor's degrees in science, technology, engineering and mathematics. Recent transfer efforts also include a transfer agreement with select Historically Black Colleges and University as well as an Associate Degree for Transfer agreement with select member institutions of the Association of Independent California Colleges and Universities.

## **Workforce Training**

The California Community Colleges is the largest workforce-training provider in the state and nation. The <u>U.S. Bureau of Labor Statistics</u> forecasts that occupations that require an associate degree will grow by 17.6% from 2012 through 2022<sup>4</sup>. In addition, the <u>Public Policy Institute of California</u> projects that if current trends in the labor market continue, the state will have a workforce shortage of 1.1 million college graduates by 2030<sup>5</sup>. Many students displaced from the University of California and the California State University systems are turning to California community colleges to begin their higher education. Approximately 29% of UC and 52% of CSU graduates started at a California community college.

The system prepares students for careers relative to state and local workforce needs and for entry-level employment, occupational advancement and career changes. California Community Colleges educate 70% of the state's nurses and train 80% of firefighters, law enforcement personnel and emergency medical technicians.

The California Community Colleges is committed to helping student veterans attain their educational goals through best practices in areas such as campus-based career development programs, earning college credit for prior learning experiences, promoting financial aid/scholarships to veterans and understanding transition experiences of women student-veterans at community colleges. The California Community Colleges educate nearly 42% of all California veterans who receive GI educational benefits to prepare student veterans for the workforce, earn an associate's degree or transfer to a four-year institution.

Voters in California approved the California Clean Energy Jobs Act (Proposition 39, 2012) in November 2012, providing for the transfer of funds – up to \$550 million annually from the California General Fund to the Clean Energy Job Creation Fund for five fiscal years, 2013-14 through 2017-18. Funds appropriated to the California Community Colleges support alternative energy efficiency projects and workforce training to prepare students for careers in energy efficiency and utility sectors through the state of California.

Additionally, Senate Bill 850 (Ch. 747, Stats. 2014) authorized the Board of Governors, in consultation with UC and CSU, to establish a landmark pilot program to meet the needs of the labor market by allowing 15 California community colleges to offer four-year degrees in career technical education not offered by the UC or CSU systems. Some of those programs include health, information management, bio manufacturing, automotive technology and dental hygiene. The Board of Governors selected the 15 pilot districts at its March and May 2015 meetings.

Through the improved transfer function, effective workforce training in emerging industries and the innovative pilot program to offer bachelor's degrees, California Community Colleges will continue to help UC and CSU achieve diversity education goals and reduce facility needs, which California Community Colleges can provide at less cost to the state than the two other public postsecondary institutions.

Facilities are an important part of the job-training program. For example, buildings with inadequate electrical capacity cannot prepare students for a computer-based job market, automotive labs with inadequate ventilation cannot be used due to student and staff safety concerns, and science labs with antiquated equipment cannot prepare students for careers in the medical field.

#### **SUSTAINABILITY**

The California Community Colleges has taken significant measures toward an environmentally-oriented future through a number of conservation efforts, as described below. The most recent sustainability effort includes the Board of Governors *Climate Change and Sustainability Policy* and *Climate Change and Sustainability Resolution*, which were adopted at the Board of Governors May 2019 meeting.

The policy and resolution align with California's broader climate change laws and directives related to energy conservation, reduction of greenhouse gas emissions, and environmental sustainability, including the California Global Warming Solutions Act of 2006 (Assembly Bill 32) and the California Climate Change Scoping Plan. Additionally, it integrates Gov. Brown's Executive Order B-30-15 and existing California Community Colleges sustainability-related policies.

The salient component of the *Board of Governors Climate Change* and *Sustainability Policy and Climate Change and Sustainability Resolution* are the eight goals for 2030, with incremental progress expected by 2025:

## California Community Colleges Goals for Addressing Climate Change and Furthering Environmental Sustainability

Goals by 2025	Goals by 2030
1. Reduce greenhouse gas emission to 30 % below 1990 levels.	Reduce greenhouse gas emission to 40% below 1990 levels.
2. Increase renewable energy consumption to 25%.	Increase renewable energy consumption to 50%.
3. 25% of fleet vehicles are zero-emission vehicles.	50% of fleet vehicles are zero-emission vehicles.
4. 50% of all new buildings and major renovations will be constructed as Zero Net Energy.	100% of all new buildings and major renovations will be constructed as Zero Net Energy.
5. 50% of all new buildings and major renovations will achieve at least a Leadership in Energy and Environmental Design (LEED) "Silver" or equivalent rating.	100% of all new buildings and major renovations will achieve at least a Leadership in Energy and Environmental Design (LEED) "Silver" or equivalent rating.
6. Increase procurement of sustainable products and services by 20% compared to current levels.	Increase procurement of sustainable products and services by 25% compared to current levels.
7. Reduce municipal solid waste by 25% compared to current levels.	Reduce municipal solid waste by 50% compared to current levels.

The intent of the Board of Governors *Climate Change and Sustainability Policy* and *Climate Change and Sustainability Resolution* is to guide California Community Colleges' climate change strategy and environmental sustainability efforts by pursuing goals that can guide the system to a sustainable future.

## **Energy Conservation**

The California Community Colleges Investor-Owned Utilities Institutional Partnership was established in 2006 to promote best practices and energy efficient technologies. Current energy code design standards for the California Community Colleges are defined in Title 24 of the California Code of Regulations. The Board of Governors' Energy and Sustainability Policy tasks the California Community Colleges with designing projects that will out-perform Title 24 Energy Standards by a minimum of 15% for new construction projects and 10% for modernization projects by providing energy incentives of two % and three %, respectively, to achieve energy efficiency.

Additionally, investment from the state's local assistance program for addressing maintenance and repair of facilities also supports energy efficiency by replacing and modifying building/campus infrastructure with newer technology and energy saving components that extend the useful life of buildings and promote sustainability.

The California Clean Energy Jobs Act (Proposition 39, 2012) has also provided funding for California Community Colleges. This legislation made it possible for community colleges to implement energy and cost saving projects across the state while creating "green" jobs and workforce training in green technology.

On April 25, 2012, Executive Order (EO) B-18-12 was issued by the Governor and it established targets for achieving Zero Net Energy (ZNE) on new and existing state buildings. ZNE is being

able to produce as much energy as it consumes over the course of a year, when accounted for at the energy generation source. EO B-18-12 requires that all new state buildings and major renovations beginning design after 2025 will be constructed as ZNE facilities with an interim target for 50% of new facilities beginning design after 2020 to be Zero Net Energy. State agencies shall also take measures toward achieving Zero Net Energy for 50% of the square footage of existing state-owned building area by 2025.

Currently, there are questions from the community college system on how to meet the ZNE goals established by this EO B-18-12. In the hopes of assisting the community college districts, the Chancellor's Office established a ZNE sub-committee to produce a guideline for the community college system. A ZNE guideline was written but will need to be revisited as to incorporate any additions related to the *Climate Change and Sustainability Policy*.

#### **Greenhouse Gas Emission Reduction**

Gov. Brown's EO B-30-15 established an interim statewide greenhouse gas emission reduction target of 40% below 1990 levels by 2030 in order to achieve its target of reducing emissions to 80% below 1990 levels by 2050 and called for various actions to be carried out by state agencies in support of the state's climate adaptation goal. The various state energy conservation programs described above align with the state's effort for increasing energy efficiency and reducing greenhouse gas emissions.

Community college districts are independent, legal entities governed by a Board of Trustees, elected by citizens residing within the districts' boundaries. In an effort to work toward sustainability, the California Community Colleges – in partnership with the Chancellor's Office, the California Energy Commission, and Southern California Edison – have developed a Sustainability Plan Guidebook, which serves as a template for colleges in the system to focus on long-term sustainability planning, including key steps for creating and implementing a Climate Action Plan.

For the California Community Colleges, building energy consumptions and transportation are key contributors of greenhouse gas emissions. Strategies for reducing greenhouse gas emissions include:

- Promoting the construction of energy efficient buildings and infrastructures.
- Evaluating the latest opportunities and applications to promote cleaner, renewable sources of energy generation.
- Focusing on sustainable building operations/practices and technological advancements.
- Improving and expanding alternative transportation options.
- Offering sustainability courses and programs to prepare students for occupations in the "Green Economy."

The sustainability planning efforts at the community college campuses will continue to evolve to meet the unique circumstances and needs of the campuses and, in lock-step with the

state's conservation programs described earlier, will continue to promote energy efficiency and resource conservation efforts, as resources become available, toward achieving long-term sustainability.

## **Water Conservation**

The California Community Colleges, through collaboration with investor-owned utilities, local and regional governments, and state agencies, have engaged in water conservation efforts in response to Gov. Brown's EO B-29-15 for reducing water usage by 25% through February 2016. In addition, the Chancellor's Office has worked closely with the Division of the State Architect on measures that will result in long-term reductions in water usage on community college campuses. Regulations, which became effective Jan. 1, 2016, require all new construction and building additions on community college campuses to replace existing landscaping, equivalent to 75% of the square footage of the building's footprint, with water saving landscaping and/or installation of water meters and other water conservation measures.

In April 2017, Following exceptional water conservation and winter rain and snow, Gov. Brown issued EO B-40-17, which lifted the statewide drought emergency in most of California, while upholding water reporting requirements and prohibitions on wasteful water practices to protect Californians against future droughts. EO B-40-17 builds on actions taken in EO B-37-16, which remains in effect to continue making water conservation a way of life in California.

#### **FACILITY NEEDS**

With this broad overview of the California Community Colleges role, as mandated by California Legislature and as contained in the California Master Plan for Higher Education, it is evident that the projected postsecondary student growth will place a larger burden, relative to the other public postsecondary systems, on the community college system. The California Community Colleges cannot effectively bear the burden without new, increased investment in facilities.

The Chancellor's Office has done an analysis of the total facilities needs for the California Community Colleges over the next 10 years (2020-21 through 2028-29) (**Appendix G**). The total facilities needs for the next 10 years, including the **\$29 billion** of unmet capital facility needs identified in this Five-Year Plan, are approximately **\$43.1 billion**. For the purposes of this plan, we conservatively estimate that **\$25 billion** of local bond funds remain uncommitted to fund state supportable projects. Generally, current and future local bond funds from the Smaller Classes, Safer Schools, and Financial Accountability Act (Proposition 39, 2006) will fund more than 40% of state supportable facilities and 100% of non-state supportable facilities such as parking lots/garages, stadiums, cafeterias, bookstores and health centers. The need for facilities to be funded by future state general obligation bonds is **\$18.1 billion**; this is after adjusting for the estimated \$25 billion of local bond funds that remain uncommitted and the uncommitted 2016 state general obligation bond funding.

The total need equates to the equivalent of **\$3.6 billion** state general obligation bond funding every two years. Given this substantial need, the state must continue to work closely with the districts to appropriately allocate scarce resources to adequately address the needs of California's community college students.

### RECONCILIATION TO PREVIOUS PLAN

### **SUMMARY OF TOTAL COST DECREASE**

The total unmet need identified for the California Community Colleges in the 2020-21 Five-Year Capital Outlay Plan ("2020-21 Plan") is **\$29.2 billion**. Of this amount, **\$22 billion** is included in the Five-Year Plan period and **\$7.2 billion** deferred to future years. The prior year's 2019-20 Capital Outlay Five-Year Plan ("2019-20 Plan") included total unmet needs of **\$30.9 billion**, with **\$23.5 billion** included in the Five-Year Plan and **\$7.4 billion** deferred to future years. The total decrease in costs between the two plans is therefore approximately \$-1.2 billion as shown below in Table 14. This represents an increase in costs between the two plans of 2%.

Table 14 - TOTAL COST DECREASE

Categories	2020-21 Plan	2019-20 Plan	Difference
Proposed Facilities in Five-Year Plan	\$22 billion	\$23.5 billion	\$-1 billion
Deferred Facilities Needs	\$7.2 billion	\$7.4 billion	\$2 billion
Total Unmet Needs	\$29.2 billion	\$30.9 billion	

The \$1.2 billion decrease in overall cost between the two years is attributable to the State of California funding 59 capital outlay projects in 2019-20, which is the largest number of state-funded projects California Community Colleges has received in years.

## CHANGES TO PLAN YEARS 2019-20 AND 2020-21

## 2019-20 Plan

Although the 2019-20 plan is not included in the 2020-21 Five-Year Plan, changes to this plan year affect subsequent years. Specifically, last year's 2019-20 Five-Year Plan included 59 proposals for state funding with a total cost of \$555 million (for preliminary plans and working drawings phases). At the time this report was prepared, California had approved all 59 projects for inclusion in the 2019-20 budget by the California Legislature and Office of the Governor.

#### 2020-21 Plan

The proposed projects included in the 2020-21 Plan, estimated at approximately \$649 million (state funding only) for the 39 continuing and 25 new start projects, reflect the budget proposal for the 2020-21 Governor's Budget, as of August 2019, and are subject to change.

The 2020-21 budget year is the third year of projects being state funded in the capital outlay process. There are a variety of reasons that a project listed in the second year of the systemwide Five-Year Plan may not appear in the first year of a subsequent Five-Year Plan. The second year of the systemwide Five-Year Plan typically represents the Initial Project Proposals submitted by the districts that appear to be state-supportable, and may be developed into Final Project Proposals in the next budget cycle. However, inclusion of a project on the Initial Project Proposal list, and therefore in the second year of projects on the systemwide Five-Year Plan, does not guarantee funding of the project in the next plan year.

The continuing phases of previously funded projects always have priority and first claim on funds available. New projects (those for which no previous phases have been funded) must compete every year for the remaining available funds. A project might appear to be very competitive when reviewed as an Initial Project Proposal, but may have changed or been redesigned such that it is no longer state supportable or as competitive as a Final Project Proposal. Even with a very competitive final proposal, there may not be enough funding available to reach that particular project. A decision could also have been made at the district level to delay the project. In short, the second year of the Five-Year Plan will change as it becomes the first year of the subsequent Five-Year Plan, and the first year of the systemwide Five-Year Capital Outlay Plan will always reflect the budget proposal submitted to the Department of Finance for inclusion in the Governor's Budget.

## APPENDIX A.1: CALIFORNIA GOVERNMENT CODE, SECTIONS 13100-13102

13100. It is the intent of the Legislature in enacting this article that the state shall establish and annually update a Five-Year Plan for funding infrastructure. The plan shall include input by the Legislature as provided in Section 13104. The plan shall identify state infrastructure needs and set out priorities for funding. The plan need not identify specific infrastructure projects to be funded, but it shall be sufficiently detailed to provide a clear understanding of the type and amount of infrastructure to be funded and the programmatic objectives to be achieved by this funding. The plan is intended to complement the existing state budget process for appropriating funds for infrastructure by providing a comprehensive guideline for the types of projects to be funded through that process.

13101. As used in this article, "infrastructure" means real property, including land and improvements to the land, structures and equipment integral to the operation of structures, easements, rights-of-way and other forms of interest in property, roadways, and water conveyances.

13102. In conjunction with the Governor's Budget submitted pursuant to Section 13337, the Governor shall submit annually a proposed five-year infrastructure plan to the Legislature. This plan shall cover a five-fiscal-year period beginning with the fiscal year that is the same as that covered by the Governor's Budget with which it is being submitted.

The infrastructure plan shall contain the following information for the five years that it covers:

- (a) (1) Identification of new, rehabilitated, modernized, improved, or renovated infrastructure requested by state agencies.
- (2) Aggregate funding for transportation as identified in the four-year State Transportation Improvement Program Fund Estimate prepared pursuant to Sections 14524 and 14525.
- (3) Infrastructure needs for Kindergarten through grade 12 public schools necessary to accommodate increased enrollment, class size reduction, and school modernization.
- (4) The instructional and instructional support facilities needs for the University of California, the California State University, and the California Community Colleges.
- (b) The estimated cost of providing the infrastructure identified in subdivision (a).
- (c) A proposal for funding the infrastructure identified in subdivision (a), that includes all of the following:

(1) Criteria and priorities used to identify and select the infrastructure it does propose to fund, including criteria used to identify and select infrastructure that by January 1, 2005, shall be consistent with the state planning priorities specified pursuant to

Section 65041.1 for infrastructure requested by state agencies pursuant to paragraph (1) of subdivision (a).

- (2) Sources of funding, including, but not limited to, General Fund, state special funds, federal funds, general obligation bonds, lease revenue bonds, and installment purchases.
- (3) An evaluation of the impact of the new state debt on the state's existing overall debt position if the plan proposes the issuance of new state debt.
- (4) (A) Recommended specific projects for funding or the recommended type and amount of infrastructure to be funded in order to meet programmatic objectives that shall be identified in the proposal.
- (B) Any capital outlay or local assistance appropriations intended to fund infrastructure included in the Governor's Budget shall derive from, and be encompassed by, the funding proposal contained in the plan.

# APPENDIX A.2: CALIFORNIA EDUCATION CODE, SECTIONS 67500-67503

67500. The California State University, any community college district, and the University of California may be reimbursed by the state for expenditures made for preliminary plans and working drawings for a capital outlay project, if all of the following conditions are met:

- (a) The project was authorized in a budget act or other statute before the preliminary plans and working drawings were prepared.
- (b) Funds for the reimbursement are appropriated by the Legislature.
- (c) All other applicable procedures were followed by the California State University, the community college district, or the University of California in expending the funds. The advance of funds by the California State University, a community college district, or the University of California, for preliminary plans and working drawings, shall be made to promote early completion of a capital outlay project authorized by the Legislature.
- 67501. (a) The University of California may, and the California State University shall, submit to the Legislature on or before November 30 of each year a comprehensive five-year capital outlay plan that includes, but is not limited to, all of the following information:
- (1) State and non-state projects proposed for each campus in each year of the plan, including a discussion of the programmatic bases for each project.
- (2) An explanation of how each project contributes to accommodating needs associated with current or projected enrollments of graduate and undergraduate students, and other needs, and the rough estimates of the costs of meeting those needs.
- (3) The estimated costs of each project, showing the schedule for when these funds will be needed, including a schedule of annual funding needs beyond the five years for those projects for which completion exceeds the timeframe of the plan and the relative priority on a campus and statewide basis.
- (4) An explanation of how the plan addresses the Legislature's intent that the universities annually consider, as part of their annual capital outlay planning process, the inclusion of facilities that may be used by more than one segment of public higher education (intersegmental).
- (5) Description and costs of activities that take place within the plan's timeframe related to the planning or establishment of new campuses.
- (b) The California Community Colleges Chancellor's office shall prepare a five-year capital outlay plan identifying the statewide needs and priorities of the California Community

Colleges. This plan shall be submitted to the Legislature on or before November 30 of each year. It is the intent of the Legislature not to consider any community college capital outlay project that is not included in the statewide five-year plan submitted to the Legislature. The five-year capital outlay plan shall include, but not be limited to, all of the following information:

- (1) Enrollment projections for each community college district.
- (2) Projects proposed for each campus in each year of the plan.
- (3) The estimated costs of each project, showing the schedule for when these funds will be needed and the relative priority on a statewide basis.
- (4) An explanation of the Chancellor's office priorities and methodology for selecting projects for state capital outlay funding.
- (5) An explanation of the Chancellor's office methodology for calculating unmet capital outlay needs for the community college system.
- (6) An explanation of how the plan addresses the Legislature's intent that the community colleges annually consider, as part of their annual capital outlay planning process, the inclusion of facilities that may be used by more than one segment of public higher education (intersegmental).
- (c) The plans for the University of California, the California State University, and the California Community Colleges shall be updated annually, taking into consideration evolving circumstances in the planning process of the institutions. The Legislature recognizes that the annual plan is a flexible, working document subject to the evolutionary change inherent in the planning process. The plan shall be designed to reflect project data changes on a year-to-year basis, and the inclusion of a project in the plan does not guarantee its viability. It is further the intent of the Legislature that the project planning guides or capital outlay budget change proposals submitted for each state-funded project proposed for inclusion in the first year of the plan specify both of the following: (1) How each project meets needs for different types of space, including, but not limited to, classrooms, teaching laboratories, research laboratories, and faculty offices. (2) The direct and indirect project costs associated with the different types of space.

67502. No reference to community colleges.

67503. (a) On or before November 1, 2010, and at least biennially thereafter, the University of California is requested to, and the California State University shall, report on the utilization of classrooms and teaching laboratories. The report shall include for each campus in their respective system the total number of rooms, number of stations, weekly student contact hours, and weekly station hours. The report shall also include the average weekly hours of station use and actual utilization as a percentage of the utilization standard.

(b) On or before November 1, 2010, and at least biennially thereafter, the Office of the Chancellor of the California Community Colleges shall report on the utilization of classrooms and teaching laboratories. The report shall include, for each college, the total number of rooms, number of stations, weekly student contact hours, average weekly student contact hours per station, and actual utilization as a percentage of the utilization standard.

APPENDIX B.1 - SUMMARY OF CAPITAL OUTLAY FIVE-YEAR PLAN

CALIFORNIA COMMUNITY COLLEGES: SUMMARY CAPITAL OUTLAY FIVE-YEAR PLAN, SUMMARY OF CAPITAL OUTLAY FIVE-YEAR PLAN

## Appendix D.1: California Community Colleges Capital Outlay Grant Application Process

Community college districts have the responsibility to maintain, modernize, and expand the facilities at their institutions on behalf of the students they serve. In order to accomplish these objectives, the districts are authorized to seek local and state financing for their facilities.

In addition to local efforts, the state's capital outlay program provides voter-approved statewide general obligation bonds through grants to fund capital outlay projects on community college campuses. These grants are developed pursuant to the annual state capital outlay grant application process and approved by the Board of Governors (Board) of the California Community Colleges. Districts often leverage these grants with local funds; however, for some districts with minimal local resources for facilities, funds provided from the state capital outlay grant application process are the only source of funds available to modernize facilities and/or construct new buildings.

The Board has adopted priority funding categories to assist districts in their capital planning efforts so that the capital outlay proposals submitted for consideration of state funding reflect the state's priorities. The Board priority funding categories give preference to projects that best meet the following priorities:

- Expand campuses appropriately to meet enrollment demands,
- Modernize aging facilities,
- Meet the space utilization standards found in the California Code of Regulations, title 5, and,
- Leverage state funds with local funds to provide facilities at the least cost to the state.

The Facilities Planning and Utilization unit (FPU) of the Chancellor's Office administers the state capital outlay grant application process for the community college system on behalf of the Board. Under the policy guidance and direction of the Board, the FPU assists districts in meeting guidelines, regulations, and other requirements to receive state funding for capital construction projects.

The capital outlay grant application process is based on the Board priority funding categories and has three district inputs which culminate in the annual capital outlay spending plan:

- 1. District five-year capital outlay plans,
- 2. Initial Project Proposals, and

#### **3.** Final Project Proposals.

#### **BOARD OF GOVERNORS PRIORITY FUNDING CATEGORIES**

There are three Priority Funding Categories for which projects are classified. Table 1 below illustrates the maximum share of state funding allocated to each category in a specific plan year as follows:

Category	Definition	Proposed Allocation (from age of building
		data)
Α	To provide for safe facilities and activate existing space	Up to 50% of Total
G	To increase instructional and institutional support spaces.	35%
М	To modernize instructional and institutional support spaces.	65%

### Category A – Life and Safety Projects

The most critical projects, life and safety projects, are assigned to Category A. Projects in Category A involve life and safety issues and are ranked according to the number of people threatened or affected by the condition of a facility or site. Please see Table 2 for details about Category A priority-criteria

## Category G - Growth Projects

Category G projects that expand space on sites earn eligibility scores based upon a site's need for space, projected enrollment growth over the next five years, the extent to which the proposed solution provides the needed space, and the extent to which local funds directly mitigate state costs of the project. Please see Table 3 for details about Category G priority-criteria.

## Category M – Modernization Projects

Projects that modernize existing space earn eligibility points based upon the age and condition of the existing facility or its infrastructure and the extent to which local funds directly mitigate state costs of the project. Please see Table 4 for details about Category M priority-criteria.

#### **FUNDING ALLOCATION BETWEEN CATEGORIES**

Category A projects involve health and safety issues and are the highest priority in the capital outlay spending plan. Category A projects are ranked according to the number of people threatened or impacted by the condition of a facility or site, and no more than 50

percent of the annual allocation of state funds is made available for projects in this category.

Once the continuing phases of previously funded projects and new Category A projects are prioritized, projects in the remaining categories are prioritized based on various factors for each Priority Funding Category. The proposals compete for the highest ranking within each category based on points calculated using the age of the facility, age of the campus, enrollment capacity load ratios, cost, project scope, and local contribution.

Projects in Categories G and M are ranked by eligibility points (highest to lowest). The annual capital outlay spending plan traditionally included a maximum of one project from any Categories G and M per authorized site per year, with the exception of Category A projects that address health and safety, seismic or infrastructure failure problems. In an effort to provide as many districts as possible the opportunity to compete for state bond funds, current policy allows one project from any Category A through F per site for a two-year period. If more than one project is eligible for potential funding from Categories A through F per authorized site, the project with the highest local ranking from the district's five-year capital outlay plan is proposed for funding. In recent years, the number of proposals seeking state funds and obtaining Board approval has greatly exceeded the amount of state funds available. Every year valid, meritorious proposals are excluded from the statewide spending plan. To mitigate such exclusions, the development of the proposed annual capital outlay spending plan may include a realignment of funds between categories.

#### DISTRICT FIVE-YEAR CAPITAL OUTLAY PLANS

Education Code sections 81820-81823 require the governing board of each community college district to annually prepare and submit to the FPU a five-year plan for capital construction. California Code of Regulations, title 5, section 57014 requires districts to receive approval of their five-Year capital outlay plans from the FPU prior to receiving state funding for projects. Districts are also required to complete district and campus master plans before preparing their five-year capital outlay plans. The districts' five-year capital outlay plans are submitted to the FPU on July 1 of each year.

#### District Master Plans

The districts' five-year capital outlay plans are based on the local education master plan and facilities master plan for each campus. The California Code of Regulations, title 5, section 51008 requires districts to establish policies for, and approve, comprehensive or master plans which include academic master plans and long-range master plans for facilities.

Master plans define how a district will meet the needs of its students and the community. They outline the short and long-range goals for a community college district and for each of its major campuses. Districts use master plans as a tool to periodically reevaluate

education programs and facilities needs in terms of past experience, current community requirements, and future goals.

An education master plan is therefore a prerequisite to the preparation of a facilities master plan. The preparation of a facilities master plan is in turn a prerequisite to the preparation of the five-year capital outlay plans districts submit annually to the FPU.

#### **Education Master Plans:**

An education master plan defines a district's goals for the future of the education program. An education plan describes current programs and details how those programs should develop in the future. The plan may introduce new programs and describe how the programs will be integrated into the curriculum and the direction in which they will grow in the future. Districts must consider state codes and regulations, long-term budget considerations, staffing requirements, and new educational delivery methods and technology when developing their education master plans.

#### **Facilities Master Plans:**

A facilities master plan is derived from the education master plan and provides a blueprint for the facilities and technology that will be required to fully implement the education master plan of a district for each campus. The decisions a district makes in developing a facilities master plan are critical due to the permanent nature of any decisions made. The construction process for buildings is lengthy and once buildings are constructed, change is very difficult. This is evidenced by the fact that 64 percent of buildings in the community college system are over 25-years old and 48 percent are over 40-years old.

Although educational programming is always supposed to drive facilities planning, the permanent nature of facilities will limit or dampen the ability of the education master plan to respond to rapid changes in the educational program, delivery systems and technology. Given this permanence, there are many factors districts must take into consideration as they develop facilities master plans:

- 1. Community College Change and Growth Community colleges are inherently difficult to plan because the only constant is change change in the size of the campus, rules and regulations, educational programs, administration, staff and faculty, and a myriad of other factors. Community college campuses often grow to many times their original size over a long period of time so the need to plan for and respond to change must be integral to a facilities master plan.
- **2. Campus Design Guidelines** The facilities master plan must define campus design guidelines, not only to provide a cohesive look for the entire campus but to ensure access and functionality. The campus needs to be designed for flexibility so that

- facilities can change to the extent possible to support changes in the educational program.
- **3.** State Rules and Guidelines California's community colleges are governed by laws, regulations and guidelines that are utilized by various governmental entities (i.e., Board of Governors, Department of Finance, and Division of the State Architect) in the review of new campuses and building projects. The facilities master plan for any campus must be consistent with state rules and guidelines.
- **4. California Environmental Quality Act** The California Environmental Quality Act requires districts to define and possibly mitigate the negative impact of construction or new development on neighboring properties. Districts must evaluate the impact of vehicle traffic, pedestrian traffic, storm water run-off, historic structures and features, and a variety of other potential impacts on neighboring properties when developing a new site or starting a new project on an existing site.
- 5. Operational Considerations The facilities planning process must take into account various operational issues, including those that influence staffing requirements and energy usage for new and/or modernized facilities. Incentives are provided by the Board and the various utility companies that encourage energy efficient design and construction. Laws and regulations impact staffing levels such as: the 75/25 percent full-time/part-time ratio of faculty; the 50 Percent Law which requires 50 percent of the operating costs to be spent on instruction; funding caps which limit the growth of a district, and collective bargaining which determines class size limitations and other working condition issues. Classroom scheduling issues must also be taken into account when determining the number and size of classrooms: faculty preference of rooms, availability of rooms, size of rooms, physical adequacy of rooms to teach specific types of courses, and the preference of students and faculty for morning classes.
- 6. Funding Availability Funding for community college facilities is always less than what is required to support the facility needs of the community college system. State funding is dependent upon the passage of statewide general obligation bonds, and local funding is dependent upon the in passage of local general obligation bonds. In recent years, the availability of state funds to finance new community college projects has been constrained due to the lack of an education bond since 2008 and local bond funds have been constrained due to voter reluctance to approve bonds in a negative economic environment, as well as decreases in assessed property values which prevent the issuance of approved local bonds. The passage of Proposition 51 (2016) of \$2 billion in state bonds and the successful passage of local bond measures in 2016 for 18 districts will provide some funding relief for community college projects. Facilities master plans must plan to the extent possible for buildings that are efficient, flexible

(can be used for more than one purpose and adaptable to change over time), and cost effective. Careful planning of classroom scheduling within existing facilities can increase facility utilization without the need for new buildings. Districts must explore alternative instructional delivery options such as distance education, which can also mitigate the need for new facilities.

Districts submit their five-year capital outlay plans using the Facility Utilization Space Inventory Options Net (FUSION) online database. FUSION is a web-based project planning and management tool activated in May 2003. A consortium of community college districts provided the initial funds to develop FUSION, and all districts annually fund the operation and maintenance of FUSION. The Foundation for California Community Colleges and the FPU provide support for FUSION. FUSION provides FPU staff, district staff and consultants access to data and applications useful in assisting with the administration of district capital outlay programs. Districts use FUSION to better assess the various components of their current buildings, update their annual space inventory reports, and update their annual district five-year capital outlay plans. FUSION is also used to prepare Initial Project Proposals and selected components of Final Project Proposals as part of the application process for state capital outlay funds.

#### INITIAL PROJECT PROPOSALS

An Initial Project Proposal (IPP) is submitted by districts requesting state funding for projects included in the district five-year capital outlay plan. The IPP provides a general project description including space, cost and funding schedule. Projects are to be submitted to the FPU by July 1 using the three-page IPP form.

The description of the intent and purpose of each project enables FPU staff to determine the appropriate Board Priority Funding Category to assign for the project. The IPP step in the screening process also allows the FPU to more accurately assess a district's capital outlay needs before there is a significant investment of time and money in projects by the district. After evaluating the IPPs, the FPU notifies the districts of those IPPs to be developed into Final Project Proposals, which are due the following year for possible submission to the Board for project scope approval.

#### **FINAL PROJECT PROPOSALS**

A Final Project Proposal (FPP) describes the scope, cost, schedule, and financing array of a project and includes conceptual drawings of the project. The description of the project in the FPP includes an assessment of the problems of the existing facilities, as well as an analysis of alternatives considered prior to proposing the recommended solution. The proposal includes a detailed space array, detailed cost estimate and summary calculation of the state fundable equipment allowance.

The FPU staff performs an in-depth analysis of each FFP. This analysis determines the following for each project:

- Accurate cost and scope,
- Board priority funding category for each project,
- Feasible calendar and timing of state funds, and
- Comparison of a project's merits with other projects in the same category.
- Scope Approval

An FPP is eligible for inclusion in the annual capital outlay spending plan if it is consistent with the requirements, standards, and guidelines outlined in the Education Code, California Code of Regulations, title 5, and the State Administrative Manual/Capitalized Assets section 6800. The FPU staff determine whether or not a proposal satisfies the required governmental rules and regulations and works with districts to refine project proposals.

#### ANNUAL CAPITAL OUTLAY PLAN

The FPU develops an annual capital outlay spending plan that will be proposed for approval by the Board. The development of the spending plan draws upon a project's priority funding category, ranking among other projects within the same category, and total need for state funds versus the availability of state funds to determine which projects may be included in the plan. Following Board approval, the annual capital outlay spending plan is submitted to the Department of Finance for consideration of funding in the next budget cycle.

**Project Phasing.** The annual capital outlay spending plan includes projects seeking state financing to complete preliminary plans, working drawings, construction, and equipment phases. Brand new projects are known as "new start projects," and projects seeking to obtain state funding for their remaining project phases are known as "continuing projects."

**Ready Access Projects.** A "Ready Access" project is a special type of new start project that is seeking a state appropriation for all phases in a single budget cycle. A district is required to finance at least 10 percent of the state supportable cost for a Ready Access project and must commit to completing the project with no changes in scope or state financing.

**Design-Build Projects.** "Design-Build" is a project delivery method that community college districts can use instead of the traditional Design-Build delivery method. A Design-Build project will be funded in two phases: 1) Design and 2) Construction. The Design-Build delivery method involves a process whereby district staff work with an

architect to develop minimum design standards, room capabilities, and functional adjacencies for new or redesigned space without first establishing floor plans. These design standards are assembled into bid documents accompanied by the anticipated project budget and distributed to multiple Design-Builders so that they can develop proposed solutions with various floor plans and elevations. District staff review the various proposals and select a winning Design-Builder who in turn completes the development of construction documents and builds the project.

Following a successful pilot test involving more than 10 projects at eight districts, Senate Bill 614 (Stats. 2007, Ch. 471) authorized community colleges to use the Design-Build delivery method for both locally-funded and state-funded community college projects costing more than \$2.5 million.

Annual funding of the proposed projects is contingent on meeting the Governor's priorities and the availability of funds to meet continuing needs. The development of the annual capital outlay spending plan also considers the state funds needed by projects in future budget years so that a project included in the spending plan can have a reasonable expectation to receive the state funds necessary in future years to allow completion of the project.

Annual "Zero-Based" Budgeting Method. The annual capital outlay spending plan is developed using a "zero-based" budgeting method in which all proposals eligible to compete in a specific fiscal year are evaluated to determine that the highest priority projects are included in the spending plan based on the funds available. FPPs not included in a specific year's spending plan must compete in a subsequent budget cycle. Between budget cycles, districts may update or modify the proposals as needed to reflect changing local needs or priorities and resubmit in the next budget cycle. Otherwise FPPs that are submitted for state funding but do not receive appropriations in the annual state Budget Act have no automatic special standing in subsequent budget cycles.

**Appeals Process.** An appeal process is available when a district believes that its project was omitted in error from either the state scope approval list or proposed annual capital outlay spending plan. Districts are urged to contact their facilities specialist in the FPU for an explanation of the project's priority status. After discussions with the facilities specialist, if need be districts may appeal in writing to the Chancellor.

## DEPARTMENT OF FINANCE/LEGISLATIVE PROCESS

Once the annual capital outlay spending plan is approved by the Board, FPU staff advocate for state funding with the Department of Finance and the Legislature for inclusion in the Governor's Budget and the state Budget Act, respectively. The FPPs included in the Capital Outlay Plan are transitioned into Capital Outlay Budget Change Proposals (COBCPs) and submitted to the Department of Finance on July 1 of each year (usually a year after the FPPs are submitted to the FPU).

The Department of Finance evaluates each COBCP for potential inclusion in the next Governor's Budget. Once the project is included in the Governor's Budget, it is then evaluated by Legislative staff for potential inclusion in the final state Budget Act. The Administration and Legislative Budget Committees scrutinize all capital construction projects to determine if projects meet current state priorities, i.e., seismic, life-safety, vital infrastructure, major code deficiencies, and increased instructional access.

# APPENDIX G.1 - SUMMARY OF 10-YEAR CAPITAL OUTLAY NEED CALIFORNIA COMMUNITY COLLEGES SUMMARY OF 10-YEAR CAPITAL OUTLAY NEED 2020-2029

A.	10-Year Projected System Needs	\$43.1	billion
	New Facilities	\$14.3	billion
	Modernization	\$25.2	billion
	New Centers	\$0.5	billion
	Inflation (for years 6-10)	\$3.0	billion
В.	Current Resources	\$25.0	billion
	\$24.6 billion local Prop 39 bond funds* \$ .4 billion State GO Bonds in 2016		
C.	State GO Bond funding needed over 10 years	\$18.1	billion
D.	State GO Bond funding needed every 2 years	\$3.6	billion

<sup>\*</sup> Generally, current and future local bonds are funding 100% of non-state supportable facilities and over 40% of state supportable facilities. Excludes local bonds already expended.

## APPENDIX G.2 - ESTIMATE OF 10-YEAR CAPITAL OUTLAY NEED CALIFORNIA COMMUNITY COLLEGES

ESTIMATE OF 10-YEAR CAPITAL OUTLAY NEED (2020-2029) (DOLLARS IN THOUSANDS)

	5-Year Plan					
	Proposal Outyear		Total	Year 6-10 est		
				Cost	Assumption	Total
Item						10 Years
New Facilities	\$8,634,906	\$1,421,188	\$10,056,094	<b>\$0</b> Based on Avg	Annual WSCH and ASF Growth Need of 1.2%	\$14,332,008
asf	5,305,572			<b>0</b> at \$1,405 per	ASF Average Cost per ASF for state funded Growth	
				projects prop	osed in the 2018-19 thru 2020-21 budgets.	
Modernization of Existing Facilities:						
Life and Safety Renovation	\$831,910	\$0	\$831,910	\$831,910 Based on pre	vious 5YP total. Carry out another 5 years.	\$1,663,820
I				Deferred mo	dernization of \$2,169,591k plus \$4,178,358k to modernize 4,642,620	
				ASF of existin	g facilities constructed between 1995-2003 at \$922 per ASF	
				Average Cost	per ASF for state funded Modernization projects proposed in the	
Modernization/Renovation	\$12,137,335	\$3,132,339	\$15,269,674	\$6,812,220 2018-19 thru	2020-2021 budgets.	\$22,081,894
Replace Temporary Buildings	\$934,065	\$342,480	\$1,276,545	\$223,945 Deferred cos	ts from first 5 years.	\$1,500,490
Subtotal Modernization	\$13,903,310	\$3,474,819	\$17,378,129	\$7,868,075	,	\$25,246,204
Subtotal Costs from Systemside 5-year Plan	\$22,538,216	\$4,896,007	\$27,434,223	\$7,868,075		\$39,578,212
(EXTRAPOLATED TO 10 YEARS)						
Facilities for New Centers				Assume 10 ne	ew centers @ \$50 million per center	\$500,000
Inflation				\$1,967,018.75 5% over five	years (non-compounding) on \$7.9 billion	\$3,035,997
				consistent wi	th inflation factor in Budget Letter 10-15	
TOTAL SYSTEMWIDE NEED						\$43,114,209
FUNDING:						
Less Local Funds						-\$24,614,466
Less Remaining State Bond Funds						-\$368,852
TOTAL REMAINING NEED						\$18,130,891

#### APPENDIX G.3 - ESTIMATE OF NON-STATE SUPPORTABLE "OTHER" INSTRUCTIONAL SUPPORT SPACE **CALIFORNIA COMMUNITY COLLEGES**

Estimate of Non-state Supportable "Other" Instructional Support Space

Total Facilities Need for Enrollment Growth	\$14,332,008	
Total "Other" instructional support space needed as a percentage of total space needed	<u>45%</u>	Table 9
in the 2020-21 systemwide 5-Year Capital Outlay Plan		
Estimated Cost of "Other" instructional support space	\$6,449,404	
		35% estimated portion of "other" space that is state supportable,
	<u>X 0.65</u>	65% estimated portion of "other" space that is non-state supportable and must be funded with local funds
Estimated cost of non-state supportable "Other" instructional support space	\$4,192,112.34	
Total available local Proposition 39 bonds	\$24,614,466	
Less non-state supportable "Other" instructional support space	-\$4,192,112	
Local bonds available to support all state supportable facilities	\$20,422,354	
Total Systemwide Need	\$43,114,209	
Less "Other" non-state supportable support space	-\$4,192,112	
State supportable facilities needs	\$38,922,097	
Percentage of state supportable facilities funded by local bonds	52%	

Examples of "other" non-state supportable facilities:

land acquisition Student Unions

Cafeterias

Maintenance Buildings

Bookstores

Office Space - non-instructional staff

Stadiums/Athletic Facilities

Health Centers

Parking

Local Bond Totals as of Nov 2018 Less local bond issues expended Local Bonds Available 2020-2029

\$ 42,876,021,000 -18,261,555,000

\$ 24,614,466,000

#### APPENDIX G.4 - TEN-YEAR PLAN BUDGET ASSUMPTIONS (2019-2028)

California Community Colleges, Ten-Year Plan Budget Assumptions (2019-2028)

2019-20 CCC Systemwide 5-YR PLAN:				
% Total Enrollment Growth 2019-2023	Appendix E		5.2%	
Average Growth Per Year			1.3%	
% Total WSCH Growth 2019-2023	Appendix E		7.9%	
Average Growth Per Year			2.0%	
ASF Needed for Future Enrollment Growth	Table 9		1,918,940	
(excludes current deficiency)				
ASF NEEDED FOR ENROLLMENT GROWTH 2025-2029:				
%CCC WSCH GROWTH ASSUMPTIONS FOR 2024-2028			1.2%	
(average growth assumption based on historical	actuals)			
Total Projected WSCH for 2025	Appendix E		18,583,000	
Total Projected WSCH for 2029			19,686,000	
Average % WSCH Increase 2024-2028			1.2%	
Total Gross Enrollment ASF Need 2024	Appendix C.7		51,270,645	
Total Projected Gross Enrollment ASF Need 2029			54,314,000	
Average Growth Increase 2025-2029			1.2%	
Projected ASF Needed for Enrollment Growth 2025-2029			3,043,355	
ESTIMATED COST of ASF NEEDED for Enrollment Growth 202	5-2029:			
Average Cost Per ASF for State Funded Growth Projects 2018-19 thru 20 \$1,405				
(includes preliminary plans, working drawings,	construction & equipment)			
Total Estimated Cost of ASF Need for Enrollment Growth 2024-2028				

APPENDIX H.1 - YEAR-ROUND OPERATIONS ANALYSIS California Community Colleges Year-Round Operations Analysis

	Student	FTES		FTES		Summer Factor	
Term	Enrollment	Total	%	Total	%	FTES (1)	%
Fall 2017	1,569,088	523,281	44.2%	526,920		526,920	
Spring 2018	1,549,322	502,143	42.5%	498,329		498,329	
	3,118,410	1,025,424	86.7%	1,025,249		1,025,249	
Primary Term Average	1,559,205			512,625		512,625	
				% of Primary Te	erm Avg	% of Primary	Term Avg
Summer 2017	716,292	121,278	10.3%	122,390	23.9%	203,983	39.8%
Winter 2017	220,033	35,919	3.0%	35,919	7.0%	59,865	11.7%
TOTAL 2017-18		1,182,621	100.0%			1,289,097	

<sup>1)</sup> In order to evaluate all terms on an equal basis, a factor must be used to make Summer and Winter FTES comparable to Fall & Spring FTES because of the shortened length of those terms (i.e., 4-6 weeks in Winter/Summer vs. 16-18 weeks in Fall/Spring). An adjustment factor of 1.67 is applied using the following methodology: [(18 weeks minus 6 weeks) divided by 18 weeks] plus 1.
