MEMORANDUM
August 18, 2023
ESS 23-36 | Via Email

TO: Chief Executive Officers
    Chief Instructional Officers
    Chief Student Services Officers
    Articulation Officers
    Transfer Center Directors

FROM: Raul Arambula, Dean, Educational Services and Support
      Cheryl Aschenbach, President, Academic Senate for California Community Colleges

RE: Revised - New TMC Version: Public Health Transfer Model Curriculum Substantive Change

Background

Senate Bill 1440 (Padilla, 2010) enacted the Student Transfer Achievement Reform Act, which required the creation of the Associate Degree for Transfer (ADT). To implement the legislation, the Intersegmental Curriculum Workgroup (ICW) was created to oversee the components and development of the statewide Transfer Model Curriculum (TMC) for each discipline. To ensure the ADTs continue to meet discipline curriculum standards, a five-year review process of each TMC was instituted. During the five-year review of the Public Health Science TMC substantive changes to the degree's curriculum necessitated the creation of a new version with the new title of Public Health TMC. This memorandum provides further information regarding degree versioning and action the CSU intends to take regarding similarity declaration. The California Community College Chancellor’s Office will release the updated Public Health TMC on Friday, September 1st and post it on the Chancellor’s Office Approved TMCs webpage.

Curriculum Guidance

Colleges are encouraged to initiate degree development as soon as possible and can begin awarding the new degree once approved by the Chancellor’s Office Curriculum staff. Colleges currently offering a Public Health Science ADT have 18 months to provide a degree that reflects the new TMC version. For more information regarding degree versioning, please refer to ESS 22-300-009 (disseminated August 4, 2022). Because both degree versions affect California State University (CSU) admission decisions, it is essential that colleges clearly identify the degree version they offer. To accomplish this:

• When entering the new Public Health ADT into the Chancellor’s Office Curriculum Inventory (COCI), the program must be entered separately from the prior version presently in

Chancellor’s Office, Educational Services & Support
1102 Q Street, Sacramento, CA 95811 | 916.445.8752 | www.cccco.edu
COCI. This will result in colleges having two Public Health degrees: the original Public Health Science ADT and the new Public Health ADT in COCI. The different titles and control numbers will allow CSU to differentiate which version a student is using to transfer. New degrees must be labeled as Public Health.

- Colleges must also locally list and transcript the new degree to clearly differentiate it from a prior version (e.g., AA-T in Public Health).

- When setting the status of the Public Health degree to "active" in COCI, colleges must simultaneously deem the prior version (Public Health Science) "Active-Teachout Only" in COCI. This action will cease new student enrollments in the older version's program while at the same time provide students the opportunity to enroll in the new Public Health program.

Advising Guidance

It is important that students pursuing an ADT in Public Health are aware of both degree versions and understand which version is most appropriate for them.

- Beginning with the fall 2024 admission cycle, Cal State Apply will list both degree versions in the Extended Profile drop down section for selection when students declare an ADT during the application process.

- CSU campuses will continue to honor similar pathways for the prior degree version for no less than three years from the date of a new TMC’s release. For example, all similar pathways to CSU campuses for the older Public Health Science degree will remain in place at least through the spring 2026 enrollment term.

- ADT search engines, such as provided on icangotocollege.com or calstate.edu/apply/transfer, will list for selection both Public Health Science and Public Health Similar pathways to a CSU campus will differ based on degree version.

- Each CSU campus will review existing similar baccalaureate pathways based on the new Public Health TMC by Spring 2024 and provide the similar lists to the California State University Chancellor’s Office (CSUCO). Those lists will then be used to update degree search engines for display as Public Health ADTs become available and are listed for search queries.

For questions regarding this memorandum, please contact Dean Raul Arambula (rarambula@cccco.edu).
